privacy. Casa Grande AZ PD utilizes retroactive search to solve crimes after they've occurred. Additionally, Casa Grande AZ PD utilizes real time alerting of hotlist vehicles to capture wanted criminals. In an effort to ensure proper usage and guardrails are in place, they have made the below policies and usage statistics available to the public.

# Community Impact

## Featured Success Stories

### Safe City Success Stories

The Casa Grande Police Department is committed to transparency, accountability, and the responsible use of technology. The Safe City Success Stories below provide real-world examples of how our Real Time Information Center (RTIC) and Flock Safety technologies are used to support investigations, locate missing persons, enhance officer safety, and protect our community. This section is updated regularly and displays recent activity to demonstrate the measurable impact of the Safe City Initiative.

These examples represent only a small snapshot of RTIC activity and outcomes and are not a comprehensive list of all cases or incidents where Safe City technology has assisted. Many uses occur daily and may not be included due to investigative sensitivity, case status, or the routine nature of the assistance provided.

---

### October 2026

RTIC personnel deployed DFR to a neighborhood regarding a subject who was making threats of self-harm. DFR located the subject and directed responding patrol officers to his specific location. DFR maintained overwatch as officers assisted and turned the call over to medical professionals.

RTIC personnel deployed DFR to a call for service regarding a domestic disturbance involving a suicidal subject. PTZ cameras were utilized and observed the subject leave a residence with a razor blade. The subject continued to threaten self-harm and was observed walking toward train tracks, with a train incoming. RTIC personnel directed patrol officers to the

subject's specific location, and they were able to provide immediate assistance.

RTIC deployed DFR to multiple reports of shots fired in a neighborhood. DFR arrived on scene and began searching the area for any suspects or evidence. Patrol units arrived in the area, and officers heard more gunshots, which generated additional 911 calls. After determining where the gunshots were coming from, officers were able to convince the suspect to exit a residence and take him into custody. DFR maintained overwatch for officer safety until the scene was made safe.

As multiple patrol officers responded to a call regarding a large group of people fighting at a local bar, RTIC personnel deployed DFR to the scene. DFR arrived simultaneously as patrol units and provided overwatch as officers detained participants and controlled the situation.

DFR was deployed to a local carwash regarding an assault. The reporting party advised the suspect walked behind the car wash and gave a clothing description to the 911 call taker. DFR arrived on scene first and began to search the area. DFR located the suspect and relayed his location to responding patrol officers, who furthered the investigation, resulting in an arrest.

DFR was deployed to a residence regarding a verbal altercation between a wife and husband. DFR arrived on scene first and secured a visual perimeter of the residence and property until responding patrol units arrived. Patrol units arrived and furthered the investigation, resulting in the arrest of the male subject.

RTIC personnel deployed DFR to a major roadway intersection regarding the report of an intoxicated driver. The reporting party advised the driver had run some red lights and stop signs, and was now looking at his tire after hitting a curb. Responding patrol officers had an extended response time due to other calls for service. DFR located the vehicle and observed it parked on the side of the road. DFR observed the driver getting in and out of the car to check the tire. Eventually, the driver got in the vehicle and drove away from the area. DFR maintained visual of the vehicle and guided officers to the location where the driver was contacted and subsequently placed under arrest for DUI.

RTIC personnel deployed DFR to a residential neighborhood regarding the report of an active fire. DFR arrived on scene first, locating two subjects walking away from the fire. RTIC staff advised patrol units of their findings and guided officers to the subjects who were walking away. One male subject began to run from the officers, climbed fences, trespassed onto people’s property, and ultimately ended up on top of the roof of a residence. The subject was identified by patrol officers and determined to have multiple felony warrants. The subject refused to come down from the roof and kept jumping back and forth to an adjacent roof. Despite extensive negotiations with the subject, he refused to come down. Officers decided to back away and leave the area. Unknown to the subject, RTIC maintained aerial DFR observation of him. He believed he was no longer being watched and came down from the roof. Ultimately, patrol officers were able to take him into custody without further incident.

RTIC personnel monitoring radio traffic heard an officer call for backup during a traffic stop. Responding officers had an extended response time, and DFR was able to provide overwatch as the officer arrested the driver.

DFR was deployed to a local apartment complex regarding a woman who was stalking a man. While responding officers were en route, the caller reported the woman entered his vehicle and fled the area. DFR was able to follow the vehicle and relayed the location to responding officers. Officers made contact with the female, allowing them to further the investigation.

DFR was deployed to a local hotel regarding a male subject getting upset and throwing a card at the cashier. DFR arrived on scene first and located the subject with two other subjects in front of the hotel. The subject then left the area in an SUV. DFR followed the vehicle, relaying the location to responding officers, allowing them to further the investigation.

RTIC personnel deployed DFR to a neighborhood regarding a possible drunk driver who crashed into a median. The reporting party also stated the driver was picked up by another vehicle, which left the area. DFR arrived on scene first and was able to relay vehicle registration information to responding patrol officers, who went to the registered owner's residence where the described driver was contacted. Officers were able to further the investigation.

DFR was deployed to a major intersection regarding an abandoned/disabled vehicle blocking traffic. DFR arrived on scene first, located the vehicle and then the driver, relaying that information to responding officers. Officers were then able to assist the driver in clearing the roadway for ongoing traffic flow.

RTIC personnel deployed DFR to a residence regarding a party where several juveniles were in the front yard. A window was broken, and it was believed that this was how the juveniles were able to gain access to the residence. Before officers arrived, several juveniles were jumping the fence into a nearby apartment complex. DFR located 5 of the subjects and relayed that information to responding officers, who were able to contact them and further the investigation.

---

## September 2026

RTIC personnel deployed DFR to a report of a disturbance at a local restaurant. DFR was first on scene and located the subjects stated to be in an altercation inside the restaurant. Utilizing DFR, RTIC personnel pointed out and guided responding patrol officers to the subjects as they were attempting to leave the area in a vehicle, allowing officers to further the investigation.

While monitoring 911 calls, RTIC personnel heard a caller report a vehicle swerving and almost hitting them. RTIC utilized PTZ cameras to determine a search area and then deployed DFR. DFR located the vehicle south on Pinal avenue and pulling into a gas station. The driver was observed exiting the vehicle, getting gas and then leaving eastbound on Cottonwood at a high rate of speed. DFR continued to monitor the vehicle which pulled into another convenience store. The driver got out and entered the store. After returning to the vehicle, the male driver continued south on Casa Grande Ave at inconsistent speeds, including a high rate of speed. The driver continued south and proceeded to run the stop sign at an intersection in a residential/park area. Patrol was able to locate the vehicle with the information given from DFR and the driver was ultimately arrested for DUI related charges.

RTIC assisted patrol with conducting searches using cameras to identify a vehicle involved in a burglary where tens of thousands of dollars' worth of

medication were stolen from a medical facility. The vehicle was observed on an LPR camera with a license plate that did not belong on that vehicle. The agency that the vehicle was registered in notified and contacted the victim who was unaware her plate had been stolen. This investigation is still ongoing.

RTIC personnel deployed DFR to a report of a female subject stating she wanted to kill herself. Upon arrival, DFR made sure the scene was secured and held overwatch as officers made contact. As soon as the scene was deemed safe, DFR returned to base.

RTIC personnel deployed DFR to a residence due to a fight in progress between multiple subjects. Upon arrival, DFR was able to maintain visual of one of the subjects involved in the altercation, but the other parties involved had already fled the scene in an unknown vehicle and direction. DFR relayed pertinent information to officers responding and remained on scene until the scene was clear.

RTIC utilized PTZ cameras to locate a vehicle collision that was reported between two vehicles with no injuries at an intersection. While utilizing the PTZ cameras, RTIC personnel were able to locate both vehicles and obtain both license plates. Shortly after, one of the vehicles involved in the collision fled the scene. Due to the license plate already being obtained by the PTZ camera, officers were able to locate and contact the driver who fled the scene at his residence and issued him a citation.

RTIC personnel deployed DFR to a domestic disturbance where a caller reported an autistic family member needed assistance. This person was reported to have left the residence in an unknown direction. Based on the caller's description of the subject, RTIC personnel were able to locate him and direct responding patrol officers to his location.

A caller reported her ex-husband was making suicidal statements, possessed a knife and was walking near a grocery store. RTIC personnel deployed DFR which located the subject walking on a sidewalk. RTIC personnel directed responding patrol officers to the man's location and they were able to provide resources for him.

RTIC personnel deployed DFR to a report of a burglary in progress. The caller stated that at their house which is boarded up, they have been having issues with people breaking in. A neighbor contacted the caller and stated there was someone currently at the residence. DFR arrived on scene and maintained aerial coverage until responding patrol officers arrived.

RTIC personnel were monitoring live 911 calls when they heard a report of multiple individuals fighting in a hotel parking lot. DFR was deployed to attempt to locate individuals involved in the fight. No one was actively fighting when DFR and officers arrived. Officers were able to confirm the incident was only a verbal altercation, not physical.

RTIC personnel deployed DFR to a report of a physical fight involving multiple subjects at an apartment complex. DFR arrived on scene and located several subjects running to a car which was trying to leave the property. This information was relayed to responding patrol officers, who were able to make contact with the subjects. Officers determined these were the subjects involved in the fight and furthered the investigation.

CGPD Patrol Officers responded to a local business regarding an armed robbery. Store personnel reported that a male subject suspected of

shoplifting produced a handgun and manipulated the slide as if chambering a round before fleeing in a vehicle. Employees were able to provide Communications personnel with a description and license plate number for the vehicle.
Real-Time Information Center (RTIC) personnel immediately began utilizing License Plate Reader (LPR) technology to locate the vehicle as it traveled through the city. Pan-Tilt-Zoom (PTZ) cameras were then used to identify several intersections the vehicle had traveled through and narrow the search area. RTIC personnel also deployed Drone as a First Responder (DFR) to assist with the search.
Through the coordinated use of these resources, RTIC personnel located the suspect vehicle parked at a nearby apartment complex and directed patrol officers to its location. DFR remained overhead to provide real-time situational awareness and scene security as officers conducted a high-risk traffic stop.
The driver refused repeated commands to exit the vehicle and attempted to flee, striking a CGPD patrol vehicle multiple times before ultimately exiting and being taken into custody. The second suspect involved in the armed robbery was not in the vehicle.
Patrol officers continued working throughout the following day to locate the outstanding suspect. Their efforts ultimately led them to a nearby apartment complex, where he was located and safely taken into custody. A firearm was also recovered from his possession.
Both subjects were arrested in connection with the investigation, bringing the search for those involved in the armed robbery to a successful conclusion.
This incident demonstrates how Safe City Initiative technology and strong street-level police work complement one another. LPR, PTZ, and DFR technology allowed RTIC personnel to quickly track and locate the suspect vehicle, provide officers with critical real-time information, and maintain aerial overwatch during a high-risk arrest.
But technology was only part of the successful outcome. When the second armed robbery suspect was not located with the vehicle, patrol officers continued working the investigation, developing information and searching for him until he was located and taken into custody the following day.

RTIC personnel deployed DFR in response to a report of multiple subjects trespassing on property. A male subject was located on the property going in and out of the residence and then observed leaving on foot. RTIC personnel relayed the subject's location to responding officers who made contact with him. Ultimately, this individual was arrested along with 3 more who were found trespassing in the residence.

RTIC personnel deployed DFR to a neighbor's report of trespassers at the residence of a person who recently passed away. DFR arrived on scene first and observed a female subject leaving the property as an officer was arriving on scene. The female subject was contacted and was found to have a valid warrant for her arrest. She was subsequently placed under arrest and booked into jail.

RTIC personnel deployed DFR to the report of a domestic disturbance regarding a woman who was trespassed from a residence, returned to the residence with a knife. Upon arrival, DFR located the female subject in front of the residence, where she got into a vehicle and left the scene prior to patrol officers arriving on scene. The DFR continued to follow the female subject in the vehicle and guided officers to her location, where she was subsequently taken into custody after a traffic stop was conducted.

RTIC personnel deployed DFR to the report of multiple callers stating a vehicle had sped through their neighborhood, crashed into a pole, and had

driven through a yard. An in-house search revealed an address associated with the vehicle that was located a couple of blocks north of where the incident occurred. DFR located the vehicle and the driver involved and guided responding patrol officers to the location where three other subjects were standing with the driver. The driver was later placed under arrest.

RTIC personnel deployed DFR to the report of woman assaulting her husband. The woman made statements regarding driving her vehicle into a wall. DFR arrived on scene and located the woman backing out of her driveway. This information was relayed to responding patrol officers who were able to take her into custody.

DFR was deployed to the call of a male subject who was reported to be suicidal and walking down the middle of a major roadway. DFR located the male subject in the dark area behind a carwash. RTIC personnel guided responding patrol officers towards his location where he was later detained and treated by medical staff.

Patrol officers were dispatched to a hit and run vehicle collision that had just occurred. RTIC personnel reviewed PTZ cameras to observe the collision and noted the at-fault vehicle left southbound from the crash site. The vehicle was registered to an address in a neighboring city. CGPD made contact with the neighboring law enforcement agency to further the investigation.

RTIC personnel deployed DFR to a residence for a domestic disturbance as a husband called 911 stating his wife was threatening to kill herself. DFR was first on scene, maintaining overwatch and scene security until responding patrol officers contacted the woman. Subsequently, the woman was transported for medical evaluation.

RTIC personnel deployed DFR to a local gas station in reference to two vehicles driving recklessly. DFR arrived on scene, located the vehicles and guided responding patrol officers to their new location across the street, allowing them to further the investigation.

DFR was deployed to a residence where someone called in reporting their neighbors were fighting and arguing. DFR arrived on scene first, and provided overwatch as officers contacted the subjects involved.

DFR responded to a local apartment complex when a female subject called and stated her ex-boyfriend was banging on the neighbor’s door and had been drinking – causing a disturbance. DFR arrived on scene first and maintained overwatch until officers arrived, contacted the subject, and placed him under arrest.

DFR was deployed to a local fast-food restaurant where a mother called 911 and stated her son was yelling at her to give him money so he could buy drugs. The mother stated her son had hit her before and stated she was now inside the restaurant and her son was in the parking lot. DFR arrived on scene first, located the subject in the front passenger seat of a vehicle, and maintained visual of him until officers arrived.

DFR was deployed to a local apartment complex where someone called in stating their neighbors were in a fight, and they could hear a woman screaming and yelling. DFR arrived on scene where it located a male subject running away from the area. DFR maintained visual of the suspect and guided responding patrol officers to his location, where he was arrested.

DFR was deployed to a residence where a daughter had called 911 stating her mother and boyfriend were fighting. The daughter advised that at one time it had been physical. DFR arrived on scene and maintained overwatch until officers contacted the subjects at the residence, allowing them to further the investigation.

RTIC personnel was alerted to a stolen vehicle traveling into Casa Grande. DFR was deployed to search for the vehicle. Although DFR did not initially locate the vehicle, it was identified at several more ALPR cameras. Ultimately, responding patrol officers were able to conduct a traffic stop and arrest the driver.

DFR was deployed to the area of a government facility where a caller stated a woman was refusing to leave, was intoxicated, and causing a disturbance. The woman left the area on foot, but DFR located her walking near the train tracks. The woman was found to have multiple warrants for her arrest. She was placed under arrest and booked into jail.

DFR was deployed to a residence in reference where a woman called 911 stating her boyfriend had punched her in the face and was bleeding from the nose and mouth. DFR arrived on scene first and located the boyfriend in the alleyway behind the residence. This information was relayed to responding patrol officers, and the boyfriend was arrested a short time later.

A woman called to report her husband was threatening to kill himself and she had tracked him to a local hotel. Further information revealed the subject attempted to commit suicide in the past and is known to carry firearms with him. DFR arrived on scene first and located the man in his vehicle. RTIC personnel guided responding patrol officers to his location where he was contacted and provided with professional medical treatment.

DFR was deployed to a residence where a reporting party called and stated her son was causing a disturbance. DFR arrived on scene first and provided overwatch as officers made contact. The subject, who also had a felony warrant, was arrested.

DFR was deployed to a residence where a reporting party stated his daughter was throwing him and his belongings out of the house while physically pushing him. DFR arrived on scene first and provided overwatch for patrol as they contacted the subjects and investigated.

## August 2026

RTIC personnel received a LPR notification regarding a stolen vehicle entering the city near the Promenade Mall. PTZ cameras in the area were used to observe the vehicle turn into the Promenade area near Target. DFR was deployed to the scene and located the vehicle in a parking space with one occupant. Patrol units were dispatched to the scene, while DFR maintained visual observation of the stolen vehicle to provide real-time information on the situation. Officers made contact with the driver of the vehicle, took him into custody without incident, and recovered the stolen vehicle.

CGPD RTIC was contacted by another agency regarding a shooting investigation with three victims. The detective stated one of the victims had a very low chance of survival. That agency's Real Time Crime Center observed a LPR hit on the suspect vehicle in the City of Casa Grande. CGPD RTIC personnel assisted the agency to successfully further their investigation.

RTIC personnel received a LPR notification regarding a vehicle wanted in connection with a shooting in another jurisdiction. RTIC personnel immediately deployed DFR, which located the suspect vehicle. DFR observed the driver exit the vehicle which allowed the investigating agency to confirm the identity of the suspect. DFR maintained a visual of the vehicle until it parked at a nearby residence. This information was relayed to the investigating agency's apprehension team, who arrived on scene and took over the investigation.

DFR deployed to a domestic disturbance where it was reported that the caller's husband had assaulted her. She stated that he left the home on foot when police were called. DFR searched the surrounding area during the investigation. Information gathered on scene led the DFR to focus its efforts on one side of a major street. With DFR's ability to cover a large area with just one officer, this allowed ground units to focus their efforts on the opposite side of the street where the suspect was located and ultimately arrested. This situation demonstrated teamwork between the RTIC and Patrol units in locating a suspect. DFR demonstrated its value and time-saving ability in covering large areas that would have normally taken multiple officers to complete.

DFR deployed for a disturbance at a local business. The reporting person stated a male subject was inside the business, yelling at employees and being aggressive. DFR held overwatch on the situation to provide real-time information on any escalating events. Patrol units arrived on scene and took over the investigation.

Real-Time Information Center (RTIC) personnel received an alert that a reported stolen vehicle had entered the City of Casa Grande. After confirming the vehicle, a moving truck, was still listed as stolen, patrol officers began searching the area while RTIC personnel utilized a nearby Pan-Tilt-Zoom (PTZ) camera to help determine its direction of travel. Once the search area was narrowed, RTIC deployed Drone as a First Responder (DFR) to assist. Patrol officers subsequently located the stolen vehicle parked and unoccupied at a residence. As officers began their investigation, DFR remained overhead and provided continuous aerial coverage of the property and surrounding area. While patrol officers were focused on the vehicle and investigation, DFR observed a woman leave the residence, climb over a wall, and flee the area on foot. RTIC personnel immediately relayed her movements and location to officers on the ground, who were able to quickly locate and detain her. The 62-year-old woman was identified as the driver of the stolen vehicle and was also found to have an active arrest warrant. She was taken into custody and booked on related charges. The stolen vehicle was successfully recovered and returned to its rightful owner.

RTIC assisted patrol with investigating a hit & run. RTIC utilized PTZ cameras to locate the time and location of the collision and to determine a suspect vehicle description. Additional cameras were used to observe the suspect flee the scene and eventually leave the city. As the vehicle was leaving, it passed an LPR camera and the vehicle was positively identified. The information was sent to the case officer to continue the investigation.

RTIC personnel deployed DFR to assist patrol with locating a reckless driver on a motorcycle. Callers reported the motorcycle doing “wheelies” on a major road. DFR located the motorcycle and observed it travelling extremely fast and changing lanes unsafely. The rider was seen turning into an apartment complex, but DFR was too far at the time to maintain a visual. This information was passed to patrol to conduct follow-up investigation.

RTIC personnel was monitoring a patrol investigation involving officers attempting to locate a vehicle where the driver was reportedly threatening staff at a tow yard. The reporting party stated the suspect told him he was going to go get a gun and come back. RTIC deployed DFR and located the vehicle parked at a residence. This information was relayed to patrol officers, and they were able to further the investigation.

RTIC personnel utilized a PTZ camera and deployed DFR to a local high school football game after an officer on scene reported multiple kids fighting. DFR arrived on scene and provided aerial coverage of the scene. The PTZ camera was utilized to identify a more specific location for responding officers.

---

## July 2026

Real Time Information (RTIC) staff was alerted, via License Plate Reader (LPR), to a stolen vehicle traveling through Casa Grande. The vehicle was reportedly stolen out of the Town of Marana. The vehicle alerted additional cameras throughout our city. Patrol units coordinated efforts to conduct a traffic stop of the vehicle. RTIC deployed Drone as a First Responder (DFR) to provide overwatch during the operation. A successful traffic stop was conducted and a male subject was taken into custody.

Casa Grande Police officers responded to a report of a missing 12-year-old boy diagnosed with autism. Family members reported that he had left the residence and had been missing for approximately one to two hours.

Patrol officers immediately began searching the neighborhood and surrounding areas while gathering additional information about the child's habits and possible destinations. As the search expanded without locating the boy, Real-Time Information Center (RTIC) personnel began monitoring the incident and deployed Drone as a First Responder (DFR) to assist with the search.

A short time later, a Good Samaritan encountered the child at a neighborhood park approximately three miles from his home. The individual allowed the boy to use a phone to contact his family and describe his location. RTIC personnel immediately redirected DFR to the park, quickly locating the child and providing responding officers with his exact location. Officers safely contacted the boy, who was reunited with his family a short time later.

CGPD Officers responded to an apartment complex following a caller’s report of a female being carried into an apartment unwillingly. RTIC personnel deployed Drone as a First Responder (DFR), which arrived and began observation before officers arrived on scene. DFR located a female matching the caller’s description and observed her on the balcony walking in and out. She did not appear to be in jeopardy. DFR maintained overwatch until officers arrived and made contact with the apartment occupants.

RTIC personnel were monitoring 911 calls and deployed Drone as a First Responder (DFR) to an active Domestic Dispute. DFR arrived before patrol officers and maintained overwatch for officer safety.

RTIC staff deployed Drone as a First Responder (DFR) to conduct a welfare check of a reported body in a trash dumpster. DFR arrived on scene and observed a female subject moving around inside of a dumpster in the rear parking lot of the caller’s residence. Patrol officers arrived, verified the welfare of the subject, and ultimately arrested her for an active arrest

warrant.

Patrol officers responded to a call for service for trespassing. The caller reported a male subject jumped into his backyard and was hiding close to his home. RTIC deployed DFR to attempt to locate the subject. RTIC located the subject, matching the description provided by the caller, and conveyed the location and direction of travel to responding officers. Officers were able to take the subject into custody as he attempted to run away through an alleyway.

RTIC staff responded to a call for backup from a patrol officer dealing with a suspicious activity incident. DFR was deployed to assist in observing the actions of a subject actively involved in drug-related crimes. The subject was arrested.

Patrol responded to a volatile domestic dispute where officers needed additional support for scene security. RTIC staff deployed DFR, which responded and provided scene security and overwatch.

Patrol responded to a reported fight in progress at a local apartment complex. Multiple subjects were attempting to leave the scene as officers arrived. RTIC deployed DFR and utilized Pan-Tilt-Zoom (PTZ) cameras to observe and identify potential participants in the incident, allowing patrol officers to successfully further the investigation.

RTIC personnel monitoring 911 calls heard a female caller reporting a male driver was trying to run her off the road. She stated he would drive aggressively behind her, get in front, then pull over waiting for her to pass and then start all over again. DFR was deployed to locate the vehicles involved. DFR immediately located these vehicles and observed the reported actions. DFR relayed intelligence to patrol officers who responded, conducted a traffic stop and investigation, ultimately citing the male driver.

RTIC personnel deployed DFR to a welfare check of a woman reported to be intoxicated and running in the roadway. DFR arrived and observed the subject running erratically in the roadway, waving down vehicles, enter and exit a vehicle, and run from the area. Real-time intelligence shared with patrol officers assisted them in finding her and safely removing her from the roadway.

RTIC personnel monitoring 911 calls deployed DFR to assist Fire Services in locating a reported person lying in the roadway, bleeding from the head. DFR located the subject, confirming they were not injured or bleeding. RTIC directed Fire Services to the subject’s location where a medical evaluation was conducted.

RTIC personnel deployed DFR to search for a reported trespasser with a machete in a residential backyard. DFR observed the house, yard, and surrounding areas. No one was observed in the area. While DFR was on scene, the reporting party called again, reporting that multiple white trucks were parked in front of her residence and were threatening her. DFR confirmed there were no vehicles near her residence. This call was cleared without patrol response.

---

## June 2026

Patrol Officers investigating a Vehicle Collision with Injuries requested RTIC staff review PTZ camera footage of the location where the collision

occurred. RTIC staff reviewed the footage, providing significant useful information for Officers to complete their investigation.

The Casa Grande Fire Department and Police Department responded to a commercial structure fire at an industrial facility within the city. The large property stores and refurbishes industrial barrels on-site and, due to the size and limited accessibility, presented unique challenges. Upon arrival, firefighters had difficulty determining the exact location and extent of the fire because the affected area was not readily visible from their initial access points.

Real Time Information Center (RTIC) staff was monitoring calls for service and deployed Drone as a First Responder (DFR) to assist. Upon arrival at the scene, RTIC staff was able to relay critical information to firefighters regarding the location of the fire, specifically providing which side of the building flames were coming from. This was an area not visible to the reporting witnesses or firefighters initially arriving on scene.

RTIC staff was advised of a reported reckless driver at the city golf course. The vehicle, a UTV, was observed driving recklessly across golf course property, including cart paths, fairways, and through the parking lot. The UTV was traveling at high speeds and through areas where pedestrians were walking. RTIC identified the vehicle utilizing LPR cameras, leading investigating Officers to identify the registered owner of the UTV. Charges are pending the outcome of the investigation.

An outside Law Enforcement agency identified a vehicle traveling over 100 mph on Peart Road approaching Rodeo Road. The agency's officer lost sight of the vehicle and was not able to conduct the necessary traffic stop to address the violation. The vehicle's description and license plate were relayed to Casa Grande Police and Real Time Information Center (RTIC) staff utilized Pan-Tilt-Zoom (PTZ) camera footage to locate the suspect vehicle. RTIC staff then deployed Drone as a First Responder (DFR) to search for the vehicle in the registered owner's neighborhood. DFR was able to locate the vehicle and this information was relayed to CGPD patrol officers and the original outside agency. CGPD officers quickly located the vehicle in motion, conducted a traffic stop. The driver was interviewed and, ultimately, arrested for criminal speeding.

---

## May 2026

RTIC deployed DFR to assist Patrol officers during a burglary investigation. DFR assisted in locating the suspect and provided situational overwatch for officers during the investigation.

RTIC deployed DFR to attempt to locate a crash location reported by an insurance company. DFR arrived on scene and searched the surrounding areas. No crash site was located, and no need for emergency services was observed, allowing patrol officers to continue routine patrol service.

RTIC deployed DFR to a local park for a reported fight in progress. When DFR arrived on scene, a large group appeared to be verbally arguing. Shortly after, DFR observed the situation escalating and became a physical fight between approximately ten people. When police arrived, multiple subjects ran away from the scene. DFR kept a visual on a suspect who appeared to be the primary aggressor and led patrol officers to his location, helping them further the investigation.

RTIC deployed DFR to respond to a call of a person banging on a door at an

apartment complex. DFR arrived on scene and was able to determine there was no one in the area. This allowed Patrol officers to break from the call and tend to a priority call for service.

RTIC deployed DFR to respond to a call of a group of juveniles damaging/spray painting graffiti on property near City Hall. PTZ cameras showed these subjects traveling to Peart Park, and this information was relayed to responding Patrol officers. Officers conducted an investigation with four juveniles, matching their identities and involvement in the criminal activity, resulting in criminal charges being filed.

RTIC was monitoring a vehicle collision with injuries. RTIC was able to gather a significant amount of evidentiary information and upload it into the call before patrol officers even arrived on scene. This saved the investigating officers critical time needed to manage the scene and return the roadway to operational condition.

RTIC was monitoring a shoplifting at a local retail center when the reporting party stated the suspect fled the area on a bicycle. RTIC utilized PTZ cameras to verify the suspect's direction of travel and deployed DFR in an attempt to locate him. DFR located the suspect, allowing RTIC staff to relay that information to responding officers. Officers arrived on scene and took the suspect into custody without further incident. DFR continued to provide situational oversight until the scene was controlled.

RTIC was monitoring a call for service regarding a domestic disturbance. Assisted by patrol officers who gathered initial intelligence, RTIC deployed DFR, which successfully located the suspect at a residence. Responding officers arrived and established a perimeter. The suspect attempted to evade officers by fleeing the rear of the home, jumping multiple residential property fences. DFR relayed specific location information to patrol officers, who were able to take the suspect into custody without further incident.

RTIC deployed DFR to a call for service regarding a missing 5-year-old. DFR arrived on scene in approximately 70 seconds and began searching the perimeter of a park. Responding officers arrived and, with the assistance of DFR, successfully located the child. Officers returned the child to their respective guardian.

RTIC used PTZ/LPR systems to identify a vehicle involved in a fraud case. The victim was scammed out of $6,000.00 during a phone call where an unknown number of suspects led the victim to believe his bank needed cash. The victim was told to hand the cash to someone in a parking lot. This vehicle was observed on camera having contact with the victim and then driving away from the scene. The vehicle and driver were identified and later interviewed. The driver stated she was driving for Uber and the victim stated he was giving her legal paperwork. She took the package to another location through Uber somewhere in Phoenix where an unknown male subject reached into her car, took the item and walked away. This case is being forwarded to the CGPD Criminal Investigations Division for follow-up.

RTIC deployed DFR to an intersection where it was reported that a driver of a vehicle was stopped in a lane of travel and blocking traffic. DFR arrived on scene and relayed information to officers for situational awareness. DFR kept a visual of the vehicle in case it drove away before officers could contact the driver. A male subject was found in the driver seat of the vehicle, asleep with a large container of alcohol within his reach. He was later arrested for DUI.

RTIC deployed DFR to a domestic disturbance where a female subject ran to

a neighbor’s house to hide from her abusive husband. The neighbor found the female crying in the driveway and alerted police. While DFR was flying to the scene, the female stated her husband had guns in the home and would be aggressive with officers. Additional information was relayed that the female fired a handgun at the husband and she was still in possession of the firearm. DFR kept a visual of the scene as police entered the home. Upon arrival at the residence, officers discovered a 46-year-old male, deceased. DFR provided overwatch for situational awareness and officer safety. CGPD Criminal Investigations Division is continuing this investigation.

RTIC assisted patrol with a domestic disturbance where a male suspect reportedly struck a female victim with a pole. The male fled the scene on foot but was located by a patrol drone in the backyard of a nearby residence. The patrol pilot stated he only had a limited amount of battery life to assist with the call. RTIC deployed the DFR to relieve the patrol pilot. DFR located the suspect again and provided overwatch while officers prepared to contact him. During this time, the suspect realized officers were on scene and began to move around the yard. DFR observed him reach into his pocket and remove a small item. Held the item consistent with someone holding the handle of a knife. RTIC staff relayed these observations and the new location of the suspect for officer safety. Patrol and K-9 units entered the yard and safely apprehended the suspect. Brass knuckles and illegal narcotics were later found in the suspect’s possession. He was arrested and charges of Aggravated Assault DV, Disorderly Conduct DV, Threats, Theft, Preventing the use of 911, Interfering with Judicial Proceedings, and Possession of Dangerous/Narcotic Drugs were submitted to the county attorney’s office.

RTIC assisted patrol with a complicated shooting investigation where the parties involved were not cooperative. Patrol officers identified a vehicle involved in the incident. RTIC utilized PTZ cameras to locate the vehicle in the Promenade Mall parking lot. This led to the identification and arrest of the shooting suspect.

---

## April 2026

RTIC was monitoring a call for service involving the report of a stolen vehicle. RTIC utilized PTZ recorded footage to identify and locate the stolen vehicle leaving the parking lot of the reported crime scene. DFR was deployed and located the stolen vehicle, abandoned in an alleyway approximately one-quarter mile away from the original crime scene. No suspect(s) was identified, but officers were able to return the vehicle to the owner.

RTIC deployed DFR to a local park where drug use was reported by a citizen. DFR searched all locations and people that were consistent with the caller's descriptions. No crime was observed.

DFR was requested by officers on-scene of a Domestic Disturbance after learning the suspect fled on foot. RTIC deployed DFR and located the suspect. RTIC then advised the on-scene officers that he was re-entering the property from the rear fence. Officers attempted to contact the suspect, who again fled on foot. DFR maintained a visual and assisted with setting a perimeter. The suspect made a final attempt to evade officers but was apprehended. He was arrested for Assault Domestic Violence, Disorderly Conduct Domestic Violence, Criminal Damage to a police vehicle and Aggravated Assault on a Law Enforcement Officer.

RTIC deployed DFR to attempt to locate three juveniles who were reported to have broken into vehicles at the Promenade Mall. A picture of the suspects

was obtained during the investigation, and descriptions were relayed over the air. DFR was able to locate them at a nearby restaurant. DFR led officers directly to one of the suspects, and he was taken into custody without further incident.

A report of multiple vehicles racing was called in. The caller stated the vehicles entered a car wash. RTIC deployed DFR. DFR maintained a visual of the car wash until officers arrived to further the investigation.

RTIC deployed DFR in an attempt to locate a vehicle that fled from officers during a traffic stop. The investigation led to a residence on the south side of the city. DFR supported patrol with overwatch, where two occupants of the vehicle were located and arrested for outstanding warrants. A third subject fled the scene on foot but was apprehended shortly thereafter. This subject was arrested for an active felony warrant out of the Department of Corrections.

RTIC reviewed video footage of an injury collision using Safe City intersection cameras. This collision required the extrication of one subject involved in the collision. All footage was uploaded into evidence while the scene was still active, furthering the investigation.

Officers contacted a suspicious person in a well-known crime area of the city. The male subject ran from officers and, in the process, committed criminal trespassing by jumping the fence into an elementary school property. Officers on scene lost sight of the suspect and began to search for him in the area. RTIC deployed DFR and located a male subject running through a nearby alleyway. Real-time intelligence was relayed to officers on scene, who were then able to locate the suspect hiding under a tree and foliage. He was taken into custody for criminal trespassing.

During a traffic enforcement suppression operation, a suspect fled from officers on foot. RTIC was monitoring the operation and utilized DFR to locate the fleeing suspect and provide real-time intelligence to officers where he was hiding. Subsequently, officers were able to establish a perimeter and take the suspect into custody without further incident.

RTIC deployed DFR to attempt to locate a vehicle reported to be driving recklessly entering the city limits. DFR located the vehicle at an intersection entering the city. A visual was maintained as the vehicle drove through parts of the city until patrol officers could contact them to further the investigation.

RTIC deployed DFR to a commercial structure fire to assist if needed. While the building was being evacuated, DFR maintained a visual on the garden area to help ensure there were no people re-entering. Fire Services was notified that this tool was available, and it was requested for assistance as it was needed. On this type of call, the DFR capabilities include overwatch, aerial view for Fire Services to view live, possible hot spots on roof or additional smoke not visible from the ground and locating roof access / mechanical boxes for Fire Services.

RTIC assisted Detectives with identifying a suspect vehicle in a child abuse case. Investigation is ongoing.

RTIC utilized DFR to locate a suspect vehicle in a reported road rage incident. A visual was maintained while the case officer met with the caller. It was determined that no crime was committed and DFR returned to base.

RTIC utilized DFR to locate a suspect during a trespass call for service. Caller

stated that the suspect also stole items from the store. A visual was maintained as the suspect tried to leave the area on foot. DFR led patrol units to the current location of the suspect and he was arrested for shoplifting.

RTIC assisted patrol with identifying a vehicle that belonged to the subject of a Welfare Check. The vehicle was located and reported to officers, who were then able to further the investigation.

RTIC utilized DFR to deploy for a reported structure fire. DFR was able to relay information directly to Fire Services before they arrived on scene, providing critical information to assist with their response.

DFR was on scene of an unrelated call when Communications announced a rollover Injury Accident. DFR responded to that scene and updated the responding units with real-time intelligence which included a subject that was severely injured and appeared to have been ejected from the vehicle. Police and Fire Services provided emergency response. Ultimately, one subject was pronounced deceased on-scene and another was arrested and booked into the county jail with forwarding charges of Manslaughter and DUI.

RTIC utilized DFR to deploy for a road rage incident. DFR located the vehicle and RTIC relayed real-time intelligence to responding officers. The vehicle was monitored until officers were able to make contact with it to further the investigation.

RTIC conducted multiple searches for a call of an aggravated assault with a firearm. The caller stated someone was chasing him in a vehicle as he drove away from his residence and pointed a gun at him. RTIC searched recorded footage and was able to locate the scene of the crime. Further searches led to the identification of the suspect vehicle, but during the investigation, the victim chose not to pursue charges.

---

## March 2026

RTIC monitored a live 911 call regarding a male subject attempting to break into a residence at a trailer park. DFR was deployed and located the suspect before the initial call for service was even completed. Real-time information was relayed to responding officers, providing them with the suspect's exact location. Upon the officer's arrival, the suspect fled on foot and was followed by DFR. A foot pursuit was initiated, and officers took the suspect into custody, all while DFR monitored the scene for safety.

RTIC monitored a domestic violence call for service involving a fight at a local apartment complex. DFR was deployed, arrived on scene before officers, and observed one of the suspects leaving in a vehicle. While maintaining DFR observation of the departing vehicle, RTIC relayed real-time information to responding officers who were able to stop the vehicle and arrest the suspect.

RTIC was monitoring a live 911 call from a witness reporting a person and vehicle matching those involved in a previous shooting. RTIC advised patrol officers and deployed DFR to the scene. Patrol officers arrived on scene and began their investigation with the driver and passenger. While exiting the vehicle, DFR observed the driver drop a bag to the ground near the front of the car. RTIC advised officers of this action. Officers checked the bag and discovered a firearm. Forensic analysis concluded the firearm matched the cartridge casings collected at the earlier shooting scene.

A Gunshot Detection Alert led to the discovery of significant evidence of a shooting, including the discovery of bullet casings, which were entered into the National Integrated Ballistic Information Network to further the investigation.

RTIC utilized PTZ camera footage to assist in identifying and locating a shooting suspect from an incident that occurred in late February. Subsequently, the suspect was located and taken into custody.

LPR cameras were utilized to identify a stolen vehicle. DFR was utilized to track the vehicle returning to the city. RTIC communicated with patrol units, who were able to locate the stolen vehicle and arrest two suspects involved in the theft.

RTIC utilized DFR to respond to a burglary in progress. DFR observed a vehicle leaving the scene via an alleyway. RTIC communicated with responding officers, assisting them with furthering the investigation. Subsequently, one juvenile and one adult were arrested.

RTIC utilized LPR and DFR to search for and locate the suspect vehicle of a hit-and-run collision. One DFR responded to the residence of the registered owner of the suspect vehicle while the other kept a visual on the nearest intersections close to the LPR hits. Subsequently, patrol was able to locate the suspect vehicle and arrest the driver for an active warrant and leaving the scene of a collision.

RTIC utilized DFR to respond to a residential subdivision regarding a vehicle pursuit. DFR was utilized to maintain a safe and secure scene while officers conducted their investigation. Subsequently, one subject was arrested for unlawful flight from law enforcement, failing to obey a traffic control device, and DUI. A second subject was arrested for an active arrest warrant.

RTIC utilized DFR to respond to the call of an aggravated assault at a local business. Although the armed suspect fled the area, witness provided significant information
including the suspect license plate number. RTIC staff utilized DFR, PTZ, and LPR cameras to follow the suspect vehicle to a residence where patrol officers were able to take the suspect into custody without further incident.

---

## February 2026

RTIC identified and located a suspect vehicle involved in a pedestrian hit-and-run. Real-time intelligence provided to officers resulted in the suspect being located and the case resolved.

A reported stolen license plate was entered into the system, allowing partner agencies to receive alerts. An agency in Flagstaff identified the vehicle in their community, assisting the case officer's investigation.

RTIC supported the activation of Gunshot Detection technology, which led to the discovery of significant evidence related to weapons violations. Officers collected cartridge casings that were entered into evidence and analyzed for potential connections to other crimes.

RTIC assisted in locating another missing elderly individual who had left home in a vehicle. The individual was located using LPR cameras and safely reunited with family members.

RTIC staff utilized PTZ and LPR cameras to identify, track, and locate a

suspect and their vehicle involved in a shooting that occurred in the downtown area. The license plate of the vehicle was entered as a FLOCK ALERT. Subsequently, a neighboring agency located the vehicle and arrested the driver for driving under the influence. This interaction aided the investigation and led to the identification of the shooter.

Drone First Responder (DFR) was utilized to locate a fleeing aggravated assault suspect. The suspect ran several blocks from the scene of the crime, navigating his way through multiple neighborhoods and backyards. RTIC staff located him with DFR and relayed real-time intelligence to the officers who were searching on foot. This led directly to the apprehension and arrest of the suspect.

RTIC utilized PTZ cameras to investigate a motorcycle versus vehicle collision that resulted in the motorcyclist sustaining serious injuries. The camera footage provided significant evidence (which would not have been identified otherwise) to further the investigation.

---

## January 2026

RTIC staff utilized PTZ and LPR cameras to identify, track, and locate a suspect vehicle involved in a theft of personal property from a local grocery store. Information was provided to the case officer, leading to the identification and arrest of the suspect.

Previously recorded PTZ camera footage was used to identify a suspect vehicle that followed a victim from a local bank after the victim used an ATM. The victim's vehicle was burglarized and money was stolen. This crime trend is commonly referred to as jugging.

PTZ and LPR cameras were used to establish a travel pattern for a vehicle associated with an individual who had an active felony warrant for weapons-related offenses.

When a panic alarm was activated at a local school, RTIC staff used PTZ cameras to monitor entry and exit points. This allowed real-time intelligence to be provided to responding officers before their arrival.

RTIC assisted in locating a missing elderly individual who had left home in a vehicle. The individual was located using LPR cameras and safely reunited with family members.

PTZ cameras were used to identify a group of juveniles at a local park who had purchased vaping products (e-cigarettes) from an individual in a vehicle. The vehicle was identified to further the investigation.

RTIC assisted in identifying a suspect vehicle involved in a pedestrian traffic collision. The vehicle left the scene, but partial license plate information and a witness description helped officers advance the investigation.

During a bank burglary alarm call, PTZ cameras were used to monitor exterior entry and exit points. RTIC staff provided real-time intelligence to responding officers prior to their arrival.

RTIC observed suspicious activity at the City's public library consistent with drug sales. Officers were dispatched, resulting in the arrest of two individuals for multiple crimes and an active warrant.

RTIC assisted in locating a vehicle associated with a domestic violence

aggravated assault at a local apartment complex. Travel data indicated the suspect had left the city and was later returning toward the scene where the victim lived. Based on real-time intelligence, officers intercepted the vehicle and took the suspect into custody.

RTIC identified a suspect vehicle involved in a second reported jugging incident, in which a victim's vehicle was burglarized after the victim was followed from an ATM. This case remains an active investigation.

Additional Notable Successes in January 2026

RTIC also assisted with the following:
- Identification of a theft suspect within three minutes of the crime being reported; stolen property was recovered and returned to the owner.
- Identification of a vehicle involved in a robbery.
- Observation of suspicious activity in the downtown public library parking lot, resulting in the arrest of a subject with a U.S. Marshals Service warrant.
- Remote monitoring of a protest at City Hall, reducing the need for an on-site police presence and helping prevent potential escalation.
- Review of recorded footage showing a City employee assisting an individual who had fallen near railroad tracks, allowing the employee's positive actions to be recognized.
