DALY CITY

Moving the following to create new line items for **DCPD**:

- Move $31,855 from Salaries & Benefits (ORT Task Force details) to Equipment/Fixed Assets toward the monitor system for the real-time crime center (RTCC)
- Move $55,930 from Salaries & Benefits (ORT Task Force details) to Equipment/Fixed Assets (RTCC monitor system)
- Move $50,870 from Salaries & Benefits (MVT/MVAT details) to Equipment/Fixed Assets (RTCC monitor system)
- Move $4,240 from Salaries & Benefits (Administrative Assistant – general grant support) to Equipment/Fixed Assets for outfitting the electric vehicles for Community Service Officers (CSO)
- Move $3,558 from Salaries & Benefits (Hourly Management Analyst – grant administration) to Equipment/Fixed Assets for CSO vehicles outfitting
- Move $7,482 from tracking devices to the RTCC monitor system (both within the Equipment/Fixed Assets category)
- Move $5,000 from tracking devices to the moped to be used as a bait vehicle (both within the Equipment/Fixed Assets category)
- Move $16,669 from Services and Supplies (catalytic converters) to Equipment/Fixed Assets (RTCC monitor system)
- Move $500 (merchandise) to the RTCC monitor system (both within the Equipment/Fixed Assets category)
- Move $9,682 from Other (Travel, Training, etc.) for the mailing campaign to the Equipment/Fixed Assets RTCC monitor system

Transfer

Salaries & Benefits to Equipment/Fixed Assets: $146,453

Services & Supplies to Equipment/Fixed Assets: $16,669

Other (Travel, Training) to Equipment/Fixed Assets: $9,682

Narrative

1. We realized a savings of $31,855 in the overtime or straight-time pay for the Organized Retail Theft Task Force (ORTTF) as the actual overtime/straight-time expenses for Year 1 were lower than the budgeted amount. We would like to reallocate the $31,855 savings to Equipment/Fixed Assets to purchase a monitor system (hardware, software, installation fees, etc.) for the real-time crime center (RTCC) to enhance the department's capabilities in addressing and preventing organized retail crime.

2. Given the significant and sustained decline in motor vehicle thefts (MVT) and motor vehicle accessory thefts (MVAT) observed over the past year, we are requesting to redirect funds allocated the ORTTF details, MVT/MVAT details, as well as tracking devices (Equipment/Fixed Assets), toward the RTCC monitor system. In addition, as the need for trackers decreases, we would like to reallocate a portion of the funds earmarked for trackers to the RTCC. We will continue to closely monitor crime data and adjust as necessary if the trend reverses.
    a. $55,930 from the overtime or straight-time pay for ORTTF details (for monitoring merchandise equipped with trackers to be placed in the bait car) to the RTCC monitor system
    b. $50,870 from the overtime or straight-time pay for MVT/MVAT details to the RTCC monitor system
    c. $7,482 from tracking devices to the RTCC monitor system

3. Although we have noted a decline in overall motor vehicle thefts, most incidents are related to moped thefts. To better combat moped-related offenses, we are requesting to reallocate $5,000 from funds earmarked for tracking devices toward purchasing a moped (including outfitting) to be used as a bait vehicle, which will be deployed as needed. We will continue to track data and adjust the location and frequency of deployments as necessary.

4. Also, we realized a savings of $4,240 in the overtime pay for the Administrative Assistant as the actual expenses for Year 1 were lower than the budgeted amount. We are requesting to reallocate the savings to the Equipment/Fixed Assets category for CSO vehicle outfitting.

5. Additionally, we realized a savings of $3,558 in the compensation for the Hourly Management Analyst as the actual expenses for Year 1 were lower than the budgeted amount. We would like to redirect the savings to the Equipment/Fixed Assets category for CSO vehicle outfitting.

6. Moreover, we are requesting to adjust the budget for Services and Supplies to reflect the reduced need for resources designated for MVT/MVAT prevention and to reallocate the funds toward the RTCC.
    a. $16,669 from the catalytic converters line item to RTCC monitor system
    b. $500 from merchandise intended to be placed in the bait car toward the RTCC monitor system

7. Furthermore, we have realized savings of $9,682 in the mailing campaign by transitioning to a digital campaign. We would like to reallocate these savings toward the RTCC monitor system.

SAN MATEO

Moving the following to create new line items for **SMPD**:

- Move $15,000 from the mailing campaign within the Other (Travel, Training, etc.) category to tire deflation devices under Equipment/Fixed Assets
- Move $10,000 from the mailing campaign to community messaging equipment under the Service and Supplies category

1. We have realized $25,000 in savings in the Other (Travel, Training, etc.) category by switching from a print to a digital campaign. We would like to reallocate $15,000 of these savings to Equipment/Fixed Assets for the purchase of tire deflation devices that allow officers to more effectively and safely apprehend ORT suspects.

2. Additionally, we are requesting to reallocate $10,000 of the savings from the mailing campaign toward Services and Supplies to purchase equipment and software for community messaging related to ORT. These items include graphic design (PD logos and badges by a graphic designer), technology (teleprompters, digital camera, microphones), public outreach campaigns (targeted advertising), and press conference materials (subscription for TVEyes).
