Thackerville ending use of Flock cameras

KTEN News

Sep 3, 2026

THACKERVILLE, Okla. (KTEN) — Thackerville is joining the list of cities that will no longer use Flock Safety cameras.

Police Chief Johnathan Buckaloo said the decision comes after reviewing the department's needs, resources, and costs.

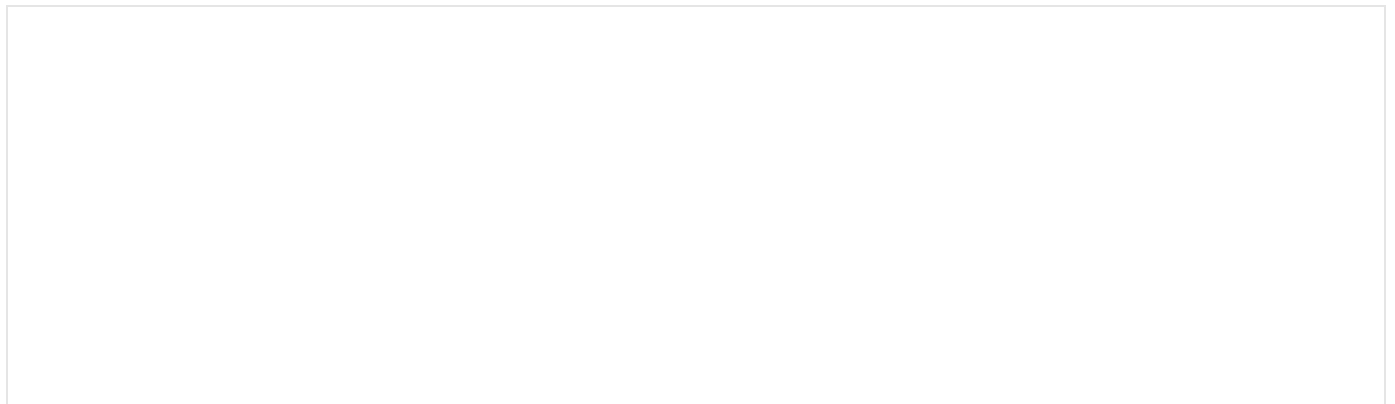

"Technology can be a valuable tool in law enforcement, but it will never replace proactive policing, good communication, strong relationships with our citizens and officers who are willing to be present and involved," he explained [in a statement posted on Facebook](#).

Buckaloo added that the decision to suspend the use of the automated license plate recognition system does not represent a reduction in the department's commitment to public safety.

Critics of Flock and other surveillance camera systems [cite civil liberties and privacy concerns](#).

According to [DeFlock Maps](#), which tracks the deployment of such cameras, there are about 10 installed in and around Thackerville.
