ADDITIONAL INFO

Yuba County SO - Facebook Post - LPR Fact versus Fiction

A technology that helped identify and arrest a homicide suspect within hours! Flock LPRs: let's talk about the facts and clear up the fiction. Ever since Flock Safety license plate reader cameras were installed throughout Yuba County in November 2022, they've helped deputies solve case after case. Stolen vehicles recovered. Suspects identified. Crimes connected. Real investigations, real victims, real results. But along with good technology comes some creative storytelling. So, let's clear a few things up. The cameras do NOT identify drivers or passengers : They do NOT spy on what you're doing inside your vehicle: They do NOT record your road trip playlist: They are NOT used to issue speeding tickets or other traffic violations: They DO capture license plates and vehicle details to help law enforcement investigate crimes: They DO provide time-stamped data that helps connect cases and locate

suspect vehicles: They DO help us keep our community safer. Think of them like a really smart notebook that remember vehicles, not people. We get it. New technology can feel a little “Big Brother-ish.” But if you’re worried about being tracked everywhere you go& your cell phone would like a word. The goal here is simple: protect our community using tools that help deputies solve crimes faster and more efficiently, while respecting privacy and staying within the law.
