MEETING DATE: June 02, 2026
FROM: Chief David Maas, Police Department
RE: Consideration of agreement for services between Axon and the Town of Grand Chute for the installation and operation of 23 fixed-point ALPR cameras
TYPE: New Business

Background Information: For about the past decade, the police department has leveraged automated license plate recognition (ALPR) solutions within the Town. The early version of this technology deployed rooftop mounted cameras on our patrol vehicles to photograph the license plates of vehicles approaching and receding from our squad cars. The data from these cameras was transmitted through the mobile data computer (MDC) before being transferred to the Town's server for storage.

In February of 2023, the Town of Grand Chute entered into an agreement with Flock for the installation and servicing of 20 fixed-point ALPR cameras within the Town. These cameras collected data at the highly travelled entry points to the Town, providing real-time alerting of vehicles that were wanted by law enforcement entering our jurisdiction. Following the installation of these cameras, the department began observing an immediate impact on our ability to solve cases quickly and efficiently. Fixed-point ALPR technology was shown to provide incredible value across the wide variety of circumstances encountered by law enforcement. This technology has helped our agency recover stolen vehicles, provided vital leads in violent crime cases, provided timely notifications in missing persons cases, and served to aid in many other legitimate law enforcement purposes. It is widely held that ALPR technology has revolutionized law enforcement from both an efficiency perspective and a crime clearance perspective.

In early 2024, the department entered into an agreement with Axon for mobile ALPR technology, leveraging the existing Axon fleet cameras installed in our squad cars. This agreement enabled the collection of ALPR data in a similar manner to the legacy technology, but did so using the front-facing squad camera rather than roof-mounted auxiliary cameras. This change reduced the complexity of upfitting for our police vehicles, centralized the data collection, and expanded the number of vehicles collecting ALPR data.

As we moved through 2024, an integration was enabled that allowed Axon ALPR data to be viewed within the Flock ALPR database. This provided significant benefit to our team, as they were able to see all ALPR data in one location. Following a change in course for the companies, this integration was ultimately severed and Axon moved to enter the fixed-point ALPR market as a competitor to Flock.

The Town has maintained an agreement with Flock for fixed-point ALPR technology since early 2023. In a companion agenda memorandum, you will read about some concerns regarding the vendor providing this technology. What must be clarified, however, is that the technology itself is vital to our continued pursuit of providing exceptional service to our community. I can provide many examples of ways in which our department has used this technology to advance our

mission of public safety. I can also tell you that we have never been made aware of an instance in which our officers have used this data inappropriately. Our department has a strict policy on ALPR technology and regularly conducts audits to ensure compliance. Given that we have nearly a decade of experience with ALPR, I believe our track record is important.

My concerns with Flock's fixed-point ALPR solution have nothing to do with the technology itself, but rather the manner in which it is deployed and controlled by the vendor. This is a sentiment echoed by leaders across the State. Recognizing these factors, Axon has developed a solution that gives ultimate control to the agency, rather than the vendor. This business model allows the agency to make decisions related to implementation and ensure the technology is used appropriately and within compliance of local policy.

The department has been an Axon customer since March of 2004. For the past 22 years, we have seen Axon develop and grow a variety of products to improve and support law enforcement. In fact, nearly everyone you talk to has an understanding of Axon's flagship product, Taser. In addition to obtaining Taser products from Axon, we also use Axon solutions for our body cameras, squad cameras, and digital evidence management. Axon's digital evidence solution (Evidence.com) houses critical evidence such as body camera video, squad camera video, Taser firing logs, and ALPR data. This system also provides capability to ingest digital evidence provided by citizens and community partners through their "community request" feature. Finally, the digital evidence solution also enables seamless sharing of evidence with prosecutors through a secure portal with the District Attorney's Office. This system is fully compliant with the FBI's CJIS Security Policy, Department of Defense IL4, FedRamp High, SOC 2, HIPAA, and many other security standards. Our longstanding relationship with Axon has been built on a foundation of trust, and we have come to expect exceptional service from them.

Every Axon product is built under a "Responsible Innovation" framework developed with input from ethicists, civil rights advocates, and community leaders. Axon has truly taken a very thoughtful approach to the development of their fixed-point ALPR technology. Below are a number of important distinctions of their solution:

- The department owns all ALPR data and hardware. Axon does not pool, resell, or repurpose the agency data. Axon's access is limited to rare support cases, only when explicitly authorized by the agency.
- The department controls the retention period for data and data is automatically purged on schedule.
- Data sharing is invite-only, visible, customizable, and revocable. Axon does not operate a national pool or enable automatic sharing between agencies.
- Axon platforms maintain immutable audit logs to determine who accessed data, when, and why. Every query creates a permanent, reviewable record.
- Axon does not use facial recognition and does not track individuals.
- Axon never discloses data or responds to legal requests on the agency's behalf.

- Data is processed at the edge (on the device) to reduce latency and exposure. All stored data is encrypted at rest and in transit.
- ALPR data is never sold to commercial entities, data brokers, or third parties.

In addition to the above information, additional information on device security, ecosystem security, and data governance from Axon is attached. If you would like to research Axon's commitments to, and implementations of, security, privacy, compliance, transparency, and data protection, you can view them at http://trust.axon.com.

Attorney Rossmeissl has reviewed the proposed Axon agreement and no changes are proposed at this time.

Fiscal Impact: As a result of extensive negotiation, Axon has agreed to terms that would match the rate the Town of Grand Chute had been paying under the 2023 Flock agreement. In addition, they have agreed to absorb the early termination fees ($11,500) from Flock incurred by the Town, shown as a discount in the first year of the agreement. Finally, they have also agreed to extend accident and vandalism coverage to all of the quoted cameras for the duration of the 5-year contract period. In total, more than $75,000 in discounts were applied to this proposed agreement. Below is a summation of the proposed fee schedule for the agreement with Axon:

2026	2027	2028	2029	2030
$50,000	$61,500	$61,500	$61,500	$61,500

The police department had budgeted $52,500 for Flock ALPR in 2026. A donation of $20,000 was received to support 3 ALPR cameras for a period of two years, beginning in 2026. The department previously expended half of the donation amount on the ALPR expansion project in 2026 and earmarked the other half to support costs in 2027.

The refund from the terminated Flock agreement is estimated at $43,883 and includes a portion of the recoverable donation funds. The remaining donation funds total approximately $10,000. Therefore, the funding for this proposed agreement would be covered by a combination of the refund from Flock and the remaining donation funds. The Town would then bear the full expense in subsequent years of the agreement.

Recommended Action: Motion to approve the agreement for services between Axon and the Town of Grand Chute as outlined in the attached quotation.

Standard Terms and Conditions

Axon Enterprise Inc. Sales Terms and Conditions

Axon Master Services and Purchasing Agreement:

This Quote is limited to and conditional upon your acceptance of the provisions set forth herein and Axon's Master Services and Purchasing Agreement (posted at https://www.axon.com/sales-terms-and-conditions), as well as the attached Statement of Work (SOW) for Axon Fleet and/or Axon Interview Room purchase, if applicable. In the event you and Axon have entered into a prior agreement to govern all future purchases, that agreement shall govern to the extent it includes the products and services being purchased and does not conflict with the Axon Customer Experience Improvement Program Appendix as described below.

ACEIP:

The Axon Customer Experience Improvement Program Appendix, which includes the sharing of de-identified segments of Agency Content with Axon to develop new products and improve your product experience (posted at www.axon.com/legal/sales-terms-and-conditions), is incorporated herein by reference. By signing below, you agree to the terms of the Axon Customer Experience Improvement Program.

Acceptance of Terms:

Any purchase order issued in response to this Quote is subject solely to the above referenced terms and conditions. By signing below, you represent that you are lawfully able to enter into contracts. If you are signing on behalf of an entity (including but not limited to the company, municipality, or government agency for whom you work), you represent to Axon that you have legal authority to bind that entity. If you do not have this authority, please do not sign this Quote.

Exceptions to Standard Terms and Conditions

Rewrite Estimates

Estimated Amounts and Contract Terminations. Any amounts stated as due under existing or terminated contracts — including contract transfer balances carried forward to new or pending contracts — are estimates based on payments received as of the calculation date. These estimates may be adjusted if new contracts are not executed on the anticipated dates or if expected payments are not made.

Refresh Shipment Timing

Technology Assurance Plan (TAP) Refresh Prior to Renewal. For Customers with expiring agreements that include TAP refresh rights, Axon may, in its discretion, ship refresh hardware under the existing contract while renewal or replacement agreements are in progress. Any such shipments will be deemed made under the terms of the existing contract until the new contract is fully executed, after which any applicable updates, fees, or adjustments will apply.

Shipment Timing

Shipment Variance. Estimated shipment dates are provided for planning purposes only and are not guarantees. Axon may ship hardware before or after the estimated shipment date, and failure to meet an estimated shipment date will not, by itself, constitute a breach, provided Axon uses commercially reasonable efforts to meet estimated shipment dates.
