PART OF THE ALPR COUNCIL AND COMMUNITY ENGAGEMENT TOOLKIT

Audit & Accountability Checklist

Approval is the start of accountability, not the end. This checklist helps you keep your program operating the way you told your council it would, and gives you a record to show it. The readiness checklist helps you assign the decisions. This one helps you review whether practice matches those decisions over time.

Use your audit logs and audit reporting tools to review access, searches, sharing activity where enabled and configuration changes. Suggested frequencies are included with each item as a starting point. Adjust them to your agency's policy requirements, applicable law and operational capacity. Document what you review so the record exists when you need it. A review trigger is a pattern worth examining, not evidence of misuse. Many will have a legitimate, documented purpose. The point is to review it, document the outcome and escalate when needed.

Done	Review Area	What to Review	What to Document
☐	**Access and searches** Frequency: Monthly	Access activity and automated license plate recognition (ALPR) searches without a linked case or stated purpose, and searches that fall outside expected patterns	Access activity and searches reviewed, anything flagged and the outcome
☐	**Repeated plate searches** Frequency: Monthly	The same plate searched repeatedly, to confirm a documented purpose	Plate reviewed, purpose confirmed or escalated
☐	**Sharing activity** Frequency: Monthly	Sharing relationships, recipient access activity where sharing is enabled, and changes to sharing relationships over time	Active relationships reviewed, recipient activity against shared data reviewed, changes documented and authorization status noted

AUDIT & ACCOUNTABILITY CHECKLIST – CONTINUED

☐	**Permission and role changes** Frequency: At each change; confirm monthly	Who gained or lost access and whether permissions still match current roles	Access changes and confirmation that roles are current
☐	**Hotlist activity** Frequency: At each change; confirm monthly	Who added or changed entries, whether sources match policy and whether approvals are documented	Hotlist changes, sources and approval records
☐	**Exports and evidence preservation** Frequency: Monthly	What was exported or preserved to a case and whether it aligns with policy	Exports and preservations reviewed, and any exceptions
☐	**Support access** Frequency: At each instance	Any agency-initiated Axon support access, confirming it was temporary, limited to the stated purpose, logged and auditable	The access, its purpose and confirmation it was scoped and logged
☐	**Public transparency portal** Frequency: Quarterly	If enabled, confirm published program information, including retention policy and available aggregate ALPR usage information, remains accurate and current	Page reviewed, discrepancies found, updates assigned and sensitive content check completed
☐	**Disclosure readiness** Frequency: Annually, or when a request arises	Whether audit records can be redacted appropriately before any external sharing	Redaction approach confirmed for external requests
☐	**Community feedback and complaints** Frequency: As received; summarize quarterly	Concerns related to ALPR use, placement, mistaken alerts, privacy or potential disproportionate impact	Concern reviewed, response or next step documented

AUDIT & ACCOUNTABILITY CHECKLIST – CONTINUED

Escalate review when any of the following appear in the audit record.

- A search has no documented case or purpose and the user cannot account for it
- Repeated access to a plate or record falls outside any active investigation
- Sharing or access is found that was never authorized
- Permissions do not match a user's current role
- A hotlist entry came from an unapproved source or skipped required approval
- An export or disclosure occurred outside policy
- Support access cannot be tied to an agency-initiated request
- Public-facing information is inaccurate, outdated or includes sensitive information
- Community feedback identifies possible misuse, a mistaken alert or an access issue

What you can share publicly

- A link to your written use policy
- Your retention policy and retention periods
- Aggregate ALPR usage information, such as retained read and hit counts or active device counts where available
- A summary of your audit review process
- A corrective-action summary where appropriate and legally permissible
- Redacted audit exports where legally appropriate and reviewed under agency policy and applicable law

Do not publish raw ALPR reads, plate numbers, plate images, personal or driver information, officer names, user-level audit logs, case numbers, hotlist contents, exact camera locations or active investigation details. Redact before any external sharing.
