Hi Martin,

The Police Department is exploring additional technology solutions available through Axon that could support our public safety operations, and Axon has offered to provide Council members with an informational briefing and demonstration of those capabilities.

The primary focus will be on Axon's ALPR technology, including its Outpost fixed license plate reader and video solution. Axon also intends to provide an overview of some of its other public safety technology, including Dedrone airspace security, as well as information regarding data security and privacy, ethical oversight, and potential contract scope and financial considerations.

At this point, the purpose is educational and intended to give Council members an opportunity to better understand the technology, ask questions directly of Axon representatives, and learn about the operational, privacy, policy, and financial considerations associated with these systems. This is not intended to represent a commitment by the City to purchase or implement any particular product.

Axon has proposed several identical small-group sessions to accommodate Council members' schedules and allow for a more conversational presentation and Q&A.

Anthony can coordinate with you on potential dates and times once we have a sense of Council availability.

Thank you,
Ed

Subject: RE: Axon briefing for council

Good morning, Anthony,

Thank you for sending this my way; I'm happy to help facilitate Council Member participation, to help provide the Council understand the context of this, would you mind kindly sending over a blurb on the context of this presentation and what services Axon are proposing for the City?

Much appreciated,
Martin

Subject: Axon briefing for council

Good morning all, Axon would like to come out to San Mateo to do an in-person executive presentation on the Axon technology and ALPR's. They are looking at some dates next week or the following week. Attached is a sample of how we can structure the day with up to two council members at a time. This would be a great opportunity for our city leaders to ask any questions they might have, and they will be hearing directly from Axon. If I could have some help with times and dates that work best with council I will work to confirm with Axon. Please let me know if you have any questions or need any further information. Thank you for your support.

Anthony
