Podcast: The FBI Was Hacked. We've Seen the Data

 JOSEPH COX • OCT 2, 2026 AT 1:37 PM

The massive FBI hack; a company wants to add facial recognition onto Flock; and Muse in some cases is actually just people.

We start this week with Joseph’s stories on the massive FBI hack. 404 Media broke this news and continued to cover the breach of data on all FBI employees and their spouses. After the break, Jason tells us how a surveillance company is telling cops it wants to add facial recognition tech to Flock camera data. In the subscribers-only section, Jason and Joseph chat all about Muse, Meta’s new agentic AI, and how humans are actually behind some of the tasks. Because of course.
