Good afternoon, San Mateo Team-

Thank you all again for your time last week. it was a pleasure meeting you in person. As discussed, I've attached a brochure that provides an overview of Axon's Vehicle Intelligence fixed ALPR solutions, Outpost and Lightpost.

I've also included additional context below regarding Axon's terms and conditions related to ALPR and agency-to-agency sharing, specific to California and SB 34.

Regarding Option A (full replacement) and Option B (identifying areas for expansion or enhanced livestream functionality), Tierney and I can provide pricing options in the near term based on the current footprint of 72 fixed ALPR cameras. However, to deliver a more comprehensive proposal, I'd like to schedule a 30–45min follow-up meeting to align on how we can best support the evolution of your fixed ALPR program moving forward.

Please let us know if you're available to meet virtually this Thursday or Friday before 1pm PST, and we'll plan accordingly.

Thank you again, and we look forward to continuing the conversation.

Patrick Newton

Axon ALPR terms and Conditions Summary:

Axon's terms differ significantly from the other ALPR provider in how we structure data privacy and sharing. All Axon ALPR cams-Fleet 3, Outpost, and Lightpost are designed so that ownership, access, and permissions remain with the agency. Axon does not pool, resell, or repurpose agency ALPR detections unless a customer has explicitly authorized such use (e.g., through ACEIP). Lawful requests for information are routed directly to the agency, ensuring they remain the sole decision-maker. This governance model is consistent across all Axon ALPR products- Unlike other ALPR vendors, Axon has no ability to access or share data "in good faith" or with third parties. As outlined in our attached MSPA (page 6, section 3): Customer Owns Customer Content. Customer controls and owns all rights, title, and interest in Customer Content. Except as outlined herein, Axon obtains no interest in Customer Content, and Customer Content is not Axon's business records. Customer is solely responsible for uploading, sharing, managing, and deleting Customer Content. Axon will only have access to Customer Content for the limited purposes set forth herein. Customer agrees to allow Axon access to Customer Content to (a) perform troubleshooting, maintenance, or diagnostic screenings; and (b) enforce this Agreement or policies governing use of the Axon products

Please note: ALPR data sharing within Fusus (if sharing is enabled but can be configured as a closed system) is invite-only, visible, revocable and includes a full audit trail on internal and external searches. Axon does not operate a national pool or enable automatic sharing that could result in customer data being shared without consent. I've also attached documentation outlining Axon's

ALPR data governance. Regrading compliance with SB 34 via Policy and Architecture:

- *Axon does not own or sell ALPR data. Customers retain full ownership of their data, satisfying SB 34's requirement that agencies maintain control over their collected ALPR information.*

- *All access to ALPR data is logged and auditable, with user-level audit trails that meet transparency requirements.*

- *Outpost and Lightpost deployments follow a permitted and documented installation process, including permitting, site assessments, and data retention policies.*

- *ALPR systems integrate with Axon Fusus, which supports CJIS-compliant cloud environments, multi-factor authentication, and role-based access controls, enabling compliance with SB 34's security and access control mandates.*
