

individual privacy. This technology is used to capture objective evidence that assists investigators without compromising the privacy of law-abiding citizens. The system is not continuously monitored or used for continuous surveillance. Instead, it is primarily used as an investigative tool, with information being queried only when there is a legitimate law enforcement or public safety purpose. This includes investigating criminal activity, identifying vehicles associated with incidents, recovering stolen vehicles, locating wanted individuals, and assisting in the safe recovery of missing or endangered children and at-risk adults. The system also generates real-time alerts for vehicles associated with validated hotlists, enabling officers to respond more quickly to significant public safety threats. The Amberley Village Police Department are committed to transparency and the responsible use of technology. As part of that commitment, this Transparency Portal provides the public with information about our use of the Flock Safety system, including usage statistics and other relevant data, reinforcing our dedication to accountability while safeguarding both public safety and individual privacy.
