Success Story

On 01/07/2026 at approximately 1647 hours, Piedmont Police Officers were dispatched to a report of a tool theft in progress. Upon our quick response, it was determined that unknown suspect(s) had just stolen a 2026 GMC Sierra 3500HD along with an attached dump trailer hauling a large quantity of concrete. The suspect(s) fled the scene in the stolen vehicle and trailer but lost control several blocks away due to the weight, ultimately colliding with a residence.

Using nearby surveillance cameras, we observed a suspect vehicle, a dark colored Honda Accord, associated with the theft of the GMC. Through Flock ALPR technology, I initially captured only a side profile image of the suspect vehicle as it fled out of town. I submitted a request for “additional footage” from one of our Flock cameras and was able to review the footage frame by frame. This allowed me to obtain a partial rear license plate; while four characters were obstructed, the last three characters were visible.

Using the vehicle description, visible stickers, and the last three characters of the plate, I searched 30 days of history for similar vehicles ending in “#310.” This led to the identification of the suspect vehicle’s full license plate and a possible suspect believed to be related to or associated with the registered owner.

The case is still ongoing, but thanks to Flock ALPR technology, we now have strong, reliable leads that are significantly advancing the investigation.

Data & Usage Summary

Data retention

The number of days data is retained.

60 days

Total Cameras

Number of LPR and other cameras.

57

Vehicles detected in the last 30 days

Number of unique plate reads over the last 30 days.

179,338

Number of Searches

Total user search sessions over the last 30 days.

79

Hotlists Alerted On

National and statewide hotlist sources.

California SVS, NCMEC Amber Alert

Number of Hotlist Hits
