

Auburn WA PD Transparency Portal

Last updated: Fri Jul 17 2026

OVERVIEW

Auburn WA PD uses Flock Safety technology to capture objective evidence without compromising on individual privacy. Auburn WA PD utilizes retroactive search to solve crimes after they've occurred. Additionally, Auburn WA PD utilizes real time alerting of hotlist vehicles to capture wanted criminals. In an effort to ensure proper usage and guardrails are in place, they have made the below policies and usage statistics available to the public.

POLICIES

What's Detected

License Plates, Vehicles

What's Not Detected

Facial recognition, People, Gender, Race

Acceptable Use Policy

Data is used for law enforcement purposes only.
Data is owned by Auburn WA PD and is never sold to 3rd parties.

Prohibited Uses

Immigration enforcement, traffic enforcement, harassment or intimidation, usage based solely on a protected class (i.e. race, sex, religion), Personal use.

Access Policy

All system access requires a valid reason.

Hotlist Policy

Hotlist hits are required to be human verified prior to action.

Network Sharing Policy

We share statewide only.

Number of Searches (Definition)

How it differs from the Organization Audit:
The Transparency Portal number is often lower than what you'd see in the Organization Audit CSV. This is because:

- The Transparency Portal de-duplicates repeated

USAGE

Data Retention

The number of days data is retained.

21 days

LPR Cameras

Number of LPR cameras only.

37

Total Cameras

Number of LPR and other cameras.

37

Hotlists Alerted On

National and statewide hotlist sources.

NCMEC Amber Alert, Washington Crime Information Center (WACIC)

Unique Vehicles Detected

Number of unique plate reads over the last 30 days.

620,127

Number of Hotlist Hits

Total hotlist hits over the last 30 days.

2,882

Number of Searches

Total user search sessions over the last 30 days.

509

Sharing Network Data With

activity, e.g., if a user runs essentially the same search multiple times within the same hour (refreshes or minor tweaks), it counts as one.

- The Organization Audit counts every individual search action, including refreshes and minor parameter changes, to provide a complete audit trail.

ADDITIONAL INFO

Recent Success Story

In the spring of 2025, Auburn Police responded to a call for service which resulted in a homicide investigation. During the investigation, APD personnel learned that a specific vehicle was used by the suspects to flee the scene. Using city owned camera footage, APD personnel managed to obtain some video of the suspect vehicle, but the clarity was limited, only allowing APD personnel to gather a general description of its make and model.

However, when APD personnel searched the Flock Safety Camera system in our city, a matching make and model was quickly located, which provided APD with a license plate number. By combining the information from the city owned camera systems with Flock, APD personnel were able to confirm the exact vehicle involved in the homicide. Within six hours, APD personnel entered the license plate into a WA State system as a Be On the Look Out (BOLO) for the awareness of all law enforcement.

Later that day, an officer from an outside agency found the suspect vehicle abandoned on the side of the road. Thanks to the quick identification of the vehicle, APD personnel were able to collect very valuable evidence. This success would not have been possible without Flock. The suspect in the homicide was later arrested and booked into jail.
