

Patrol Training Days (4/10/24 & 4/22/24) – ALPR training update

Outline

PURPOSE

- Refresher training on SOP for using LPR databases to ensure we are following SOP and in compliance with law and policy
- Have Officers become familiar and confident in utilizing LPR database during the course of their shift to assist in their investigations
- Refresher training on how to request to create a internal hot list for a vehicle

1. SOP #205 -**Venikov/Trujillo**

- **Reason code for searches using when using a LPR platform.**
(“investigations, Stolen vehicle, narc case” are not acceptable)
 - Use CAD numbers with a brief description such as, “ CAD #, Robbery car from Belmont”
 - If no CAD, give brief description to help you recall in case of a audit
- **Proper radio transmissions (refrain from saying, “10-28 the last flock hit) -Trujillo**
 - Not everyone has the same alerts
 - Causes for confusion with dispatch
 - Supervision purposes
 - Proper radio transmission, call sign, 10-28 on a ALPR hit, location, area check/visual or no visual
 - DO NOT advise, dispatch has been asked to send a cover, let the cover respond
 - Slow it down, should you come across a stolen car, think about the tools we have to use to safely detain the vehicle and occupants

- **Verify LPR hit -Trujillo/Venikov**

- It's important to confirm with dispatch and pay attention to detail about the return (example – silver prius vs black prius)
- An unclear photo of a plate is most likely a mis-read (will show examples)

- **Creating custom hotlist -O'Rourke/Trujillo-** ALPR End-Users and Operators can enter vehicles into the Hotlist when investigating Misdemeanor/Felony crimes and must have vehicle license description/plate. The following outlines the criteria and process for making Hotlist entries:

- 1) Identify a need for a Hotlist entry
- 2) Get Watch Commander or Supervisor approval for Hotlist entry and required email.
- 3) The email will contain the following information:
 - a. Vehicle license plate/description
 - b. Crime associated with the investigation
 - c. Case number
 - d. Case Investigator name
 - e. Length of time they wish to keep this info in the Hotlist
 - f. Instructions for Officers that encounter the Hotlist vehicle.
- 4) Send the email to HOTLIST@cityofsanmateo.org. and copy the approving supervisor. This email will include the current ALPR Committee Members assigned to Patrol that will make the Hotlist entry. (O'Rourke, Trujillo, Sam Leung, & Venikov)
- 5) Hotlist entry will be removed 2 weeks after it is entered.
- 6) Hotlist extension requests are sent to HOTLIST@cityofsanmateo.org indicating the extension request, timeframe, and the approving supervisor. Copy the approving supervisor.
- Hotlist Example: Officer Jones requests to enter the below content into the Hotlist for 14 days/weeks. I have obtained approval from Sgt. Pink. Vehicle License Plate 1ABC234, blue Honda Civic, armed 211, firearm outstanding, Case 220728022, Officer Jones, Hotlist entry instructions: Please stop, ID and photograph the vehicle occupants. Call Officer Jones before releasing the vehicle and its occupants.

- **Custom hotlist options –(demonstration) - O'Rourke**

- Building hot list for certain crimes
- Geofencing a certain area
- Build hotlist based off certain vehicle descriptions

- **Look up tool bar (demonstration) - Trujillo**

- Need a plate
- Will give you parking reads via Axon fleet
- Past 30 days, go to evidence.com
- Does everyone know how to review plate reads on Axon dashboard?
- Three dots on bottom right corner of a hit, what you can do (daytime photo vs night time)
- Pixelated reads = probably not a confident read

10851 & other investigations – follow away vehicles and identifying suspect vehicles – O'Rourke

- Provide them with a 10851 scenario
- Think about before and after time lines
- Know your camera areas so you can limit your scope to that area and then work a wider scope
- Keep in mind of blind spots (lack of camera coverage)
