FLOCK SAFETY ENGAGES BISHOP FOX TO BOLSTER CYBERSECURITY FOR PUBLIC SAFETY PLATFORM

Also Noted

SSN Staff

Updated 9:04 AM CST, Mon February 2, 2026

ATLANTA—Flock Safety, a safety technology platform dedicated to creating thriving communities, and Bishop Fox, an authority in offensive security, will launch a comprehensive testing campaign to provide third-party evaluation of Flock's technology as part of the

X Dismiss

This project builds on Flock's ongoing investment in security governance, which includes maintaining an annual SOC 2 Type II on Security and Availability Trust Service Criteria, a certification on ISO 27001 Information Security Management System, and compliance with Criminal Justice Information Services (CJIS) Security Policy.

Bishop Fox's offensive security experts will engage in complex, multistage and multilayer adversarial testing across all of Flock's products, both hardware and software. The results and any ensuing updates will be communicated transparently to reinforce confidence in Flock's strong security posture.

"Flock's customers and the public at large should expect the most advanced cybersecurity program in the public safety industry, and that is why we are bringing on the most respected leader in offensive security, Bishop Fox," said Chris Castaldo, Flock's chief information security officer (CISO).

You can learn more about Flock's position on data security and integrity at <https://www.flocksafety.com/privacy-ethics>.
