Even the billionaire funding Flock cameras in San Francisco has concerns

Crypto founder Chris Larsen, who has put more than \$12 million toward police surveillance technology, said the data gathered should be wiped more often.

Tech billionaire Chris Larsen, cofounder and executive chairman of Ripple, shared some concerns about Flock cameras and some of the standards for its use by police. | Jungho Kim

But the crypto founder also shared privacy concerns about how the cameras are used and suggested some changes.

“I think San Francisco could do — needs to do a better job,” Larsen told Swisher. “San Francisco keeps Flock information for a year. That’s way more than the average. The average is about 30 days.”
