

Dear Brian C,

In accordance to Government Code Section § 7922.525 a legal review of your request was completed. The following letter is in response to your comments submitted under Reference # W012462-040226.

On April 7, 2026, you were notified that a large number of records were associated with your request under W012462-040226. This notification inadvertently referenced an initial batch of records as if they had already been released. However, at that time, the records were still under review, and the initial batch was not posted until April 21, 2026. Due to an upload error, the documents were not fully posted to your account until 1:32 PM on April 21, 2026. We apologize for any inconvenience this may have caused.

All responsive records reviewed to date have been provided. You have previously been advised of the applicable exemptions under #W012462-040226. The additional records you are seeking are exempt from disclosure pursuant to Government Code section 7923.600, as they constitute law-enforcement investigative records.

As mentioned to you previously under #W012596-042226 and #W012597-042226, the PRA does not require an agency to create a "privilege log," or list, that identifies the specific records being withheld. The response only needs to identify the legal grounds for nondisclosure [*Haynie v. Superior Court*, supra, 26 Cal.4th at p. 1075].

In regard to Hot-list alert verification, the San Mateo Police Department has conducted a diligent search and has determined that no responsive records are maintained.

As previously stated on April 7, request #W012462-040226 generated a substantial volume of documents requiring staff review. This request alone resulted in 211,872 documents requiring evaluation.

City staff are dedicating approximately 10 hours per week to triaging your requests, in addition to their regular duties serving and protecting the community. Due to limited staff resources and the volume of records involved, the City is unable to provide a definitive completion date at this time. Staff will continue processing this request and will provide responsive records on a rolling basis as they become available.

Following an extensive review with the City's legal team of the ten open requests currently submitted by you, the City has determined that this request will be prioritized, as it encompasses the scope of your other email-related requests.

As previously noted for #W012596-042226 and #W012597-042226, the City's system does not categorize or organize records into discrete batches based on the specific criteria outlined in a request. Instead, records are processed and uploaded in a non-sequential, system-generated order. Due to this functionality, responsive records are being reviewed and produced in bulk as they become available, rather than grouped according to the categories identified in your request. As a result, the City is unable to identify or designate batches as corresponding to specific categories. In addition, the City's system for reviews provides us with the records required for review.

Additionally, the City's records review system provides documents in the same format in which they are made available to you. The City does not have control over formatting issues, such as broken images contained within marketing emails. We apologize for any inconvenience this may cause.

The City affirms that it is making a good faith and diligent effort to process and respond to your request in accordance with the California Public Records Act. This includes conducting a reasonable and thorough search for responsive records, reviewing records for applicable exemptions, and producing non-exempt records on a rolling basis as they become available, consistent with statutory requirements and practical limitations.
