Transparency on ALPR Technology and Community Safety

The Baldwin Park Police Department has used Automated License Plate Reader (ALPR) technology for the last four years, which utilizes fixed-location cameras in areas of the city experiencing significant theft, retail theft, and violent crimes. The program has proven to be highly effective in identifying repeat offenders and stopping crime trends.

The system is funded through the Police Department budget. There is no dedicated staffing or monitoring associated with it. Flock Safety technology (Flock) has significantly streamlined investigative work, saving hundreds of manual investigative staff hours.

Unfortunately, there is misinformation associated with recent articles on the web, which gives the impression that the appropriate privacy controls are not in place and that police departments are sharing information with Federal law enforcement agencies, in particular, Immigration and Customs Enforcement (ICE).

Attached to this message for reference is a letter from the CEO of Flock addressing Data Ownership and Sharing, and additional safeguards that ensure every agency that can use Flock does so in accordance with local laws and community values. Additionally, below are bullet points that provides additional information:

The data is not shared with ICE, Border Patrol, or any federal agency for immigration enforcement, consistent with City policy

and state law.

ALPR data is encrypted (AES-256): Information collected by the ALPR cameras is protected using one of the strongest encryption methods available. In addition, the system storing the information follows internationally recognized security standards (ISO 27001).

The manufacturer adheres to Cybersecurity and Infrastructure Security Agency (CISA) "Secure by Design" principles: The company that makes the ALPR system designs its equipment and software with cybersecurity as a priority from the start. This follows federal guidelines.

The system, retention, and access are regularly audited by the Department on a yearly schedule.

The ALPR does not have facial recognition or listening capabilities.

The use of the fixed-location ALPR system, in the time it has been active, has led to arrests in two homicides, recovery of over 80 stolen vehicles, arrests for catalytic converter thefts, and multiple arrests for other significant criminal violations that otherwise would not have been solved.

Flock offers its systems to private companies and organizations. For those entities, their camera networks operate independently unless they choose to share their data with the Police Department. We do not have visibility or access to private networks unless the data is explicitly authorized.

The Baldwin Park Police Department is committed to protecting community members from criminal activity and uses available technology to enhance this ability. We continually evaluate the efficacy of this technology and any potential negative impact it may have. Searches for vehicles through the ALPR database are done in conjunction with active criminal investigations and are regularly audited by the Department and the system administrator.

I can understand our community's concerns about the potential for misuse or abuse of the ALPR technology. There are multiple systems in place to ensure that our use of this highly effective tool is done within the bounds of the law and policy. No technology replaces proactive policing or our community partnerships. However, ALPRs are a meaningful and important investigative tool that help bring offenders to justice and ultimately reduce victimization across our community.

We will remain attentive to community feedback and continue providing information and education about how the City's ALPR program operates, the safeguards in place, and the steps to protect privacy.
