

Glendale CA PD Transparency Portal

Last updated: Tue Jun 30 2026

OVERVIEW

Glendale CA PD uses Flock Safety technology to capture objective evidence without compromising on individual privacy. Glendale CA PD utilizes retroactive search to solve crimes after they've occurred. Additionally, Glendale CA PD utilizes real time alerting of hotlist vehicles to capture wanted criminals. In an effort to ensure proper usage and guardrails are in place, they have made the below policies and usage statistics available to the public.

POLICIES

What's Detected

License Plates, Vehicles

What's Not Detected

Facial recognition, People, Gender, Race

Hotlists Alerted On

National and statewide hotlist sources.

California SVS, NCMEC Amber Alert

Unique Vehicles Detected

Number of unique plate reads over the last 30 days.

1,297,488

Number of Hotlist Hits

Total hotlist hits over the last 30 days.

2,746

Number of Searches

Total user search sessions over the last 30 days.

1,235

ADDITIONAL INFO

Recent Success Story

RTIC conducted a post-crime investigation into a November 5, 2025 vehicle burglary at Max's Restaurant in Glendale, where approximately \$750,000 in jewelry was stolen from a Lexus. Utilizing Flock camera data and real-time tools, RTIC reconstructed the victim's route from South Pasadena and identified two suspect vehicles - a black Ford sedan and a grey Lexus SUV - traveling in coordinated proximity behind the victim. Through time-stamped LPR hits and convoy analysis, RTIC confirmed consistent trailing behavior and coordinated movement into Glendale prior to the crime. This investigative work established the vehicles' association with the suspects and contributed to the suspect's arrest on March 5, 2026 for burglary and grand theft.
