Kelly-

The cameras that state "in planning" were rejected locations and should not be listed in the portal. Flock is working with their team to get them removed for us.

Regarding the MOU questions you had earlier, attached is our Flock contract and the pages that should hopefully answer some of the questions are listed below:

The contract explicitly addresses "sharing relationships" in two primary contexts: data and network sharing with other jurisdictions or the community, and the legal relationship between Flock Safety and the Customer.

Data and Network Sharing Features:

The agreement includes multiple features designed to share data and collaborate with other entities:

- * Page 2 - National and Local Sharing: page 2.
- * Page 9 - State and Nationwide Networks (LP Lookup Only), Direct Share - Surrounding Jurisdiction, Community Cameras, Custom Hot List Deconfliction Portal,
- * Page 4 - Transparency Portal
- * Page 16 - Legal Compliance:
- * Page 25 - Section 11.5 of the Master Services Agreement explicitly defines the legal parameters of the relationship.

Thank you,

Lieutenant Steve Casazza
