RE: PUBLIC RECORDS REQUEST of September 08, 2026, **Reference # W013399-090826**

Dear Brian C,

The City received the following records request from you on September 08, 2026.

Public Records Act Request — ALPR reason-entry compliance and enforcement records

As you are aware, the Department produced on June 23, 2026 under W012320-031126 an interoffice memorandum dated July 22, 2022, titled "MANDATORY REASON FOR ALPR QUERIES," which states that "inadequate entry of the REASON for your ALPR query will result in the suspension of your access to the databases and receipt of a Record of Discussion (ROD)," and that "Remedial training is required for reinstated access." That memorandum requires, for every query, a "Case or Incident number associated with the query," or failing that "a specific crime code or name of the crime and the vehicle description." For queries made on behalf of outside agencies it requires agency name, requestor name, and case or incident number, and states that "If there is no case or incident number, the query will not be completed."

The same production included June 27, 2022 correspondence in which a Criminal Investigations Bureau sergeant wrote "I am conducting an ALPR audit per department policy" and, addressing a specific query, recorded the Department's position that a reason of "INVESTIGATION" "does not meet the requirement" — the same deficiency the July 22, 2022 memorandum states "will result in the suspension of your access to the databases and receipt of a Record of Discussion."

As you are also aware, the search audit records the Department has produced under W012541-041426 and W012818-053026 contain 105,315 queries for the period January 1, 2023 through August 31, 2026. Of those, at least 64,891 — approximately 62 percent — state "investigation" as the entire reason for the query. The median such query carried a networkCount of 112.

I request the following records, from June 1, 2022 to the present:

- 1. The issued version of the July 22, 2022 memorandum "MANDATORY REASON FOR ALPR QUERIES," including any version bearing the signatures called for in its approval block, and any version addressed to dispatchers in addition to sworn personnel.*
- 2. The "Two previous memos" referenced in that memorandum, and records of the "in person lineup training" it describes.*
- 3. Records of Discussion issued in connection with inadequate entry of the REASON for an ALPR query, and records sufficient to show the number of such Records of Discussion issued in each calendar year. If the Department's position is that a Record of Discussion is not generated for each inadequate REASON entry, records describing the standard the Department applies in determining when one is issued.*

By way of example, and without limiting the scope of this item, the following queries appear in the search audit records the Department produced under W012541-041426 with "investigation" as the entire stated reason:

For each of the queries listed above, I request records reflecting whether a Record of Discussion was issued, whether access to the databases was suspended, and whether remedial training was completed. For the remaining queries in the produced audit records stating "investigation" as the entire stated reason, I request any log, index, tracking record, database, or other compilation the Department maintains reflecting which ALPR queries resulted in a Record of Discussion, a suspension of access, or remedial training.

4. Records of the suspension and reinstatement of user access to the ALPR databases, including Flock and Vigilant user-account administration records reflecting access removals and restorations, and records sufficient to show the number of access suspensions imposed in connection with inadequate entry of the REASON for an ALPR query in each calendar year.

5. Records of the "Remedial training" the memorandum requires for reinstated access, including curricula, rosters, and completion records.

6. The ALPR audit described in the June 27, 2022 correspondence, including the query set reviewed, the entries identified as not meeting the requirement, the responses received, and any resulting determinations.

7. Records of any review, audit, or monitoring of REASON entry for ALPR queries conducted after July 22, 2022, including the query sets reviewed and any findings, determinations, or corrective actions.

8. Records identifying the membership and charter of the ALPR Committee (alprcommittee@cityofsanmateo.org), its meeting records, and records of the "Leadership meeting" and "CS meeting" at which the course of action for inadequate REASON entries was discussed.

9. Audit records for the Vigilant search platform, which the July 22, 2022 memorandum identifies alongside Flock as subject to the audit that prompted it.
