Half Moon Bay officials weighing automated license plate readers

Technology can be used to solve crimes, but has also brought up concerns over privacy

By Holly Rusch, Daily Journal staff
Feb 24, 2024

The possibility of installing automated license plate readers in Half Moon Bay despite potential privacy concerns, was discussed by the City Council with its majority expressing interest in the proposal pending additional information on efficacy, data privacy and the policies of nearby cities.

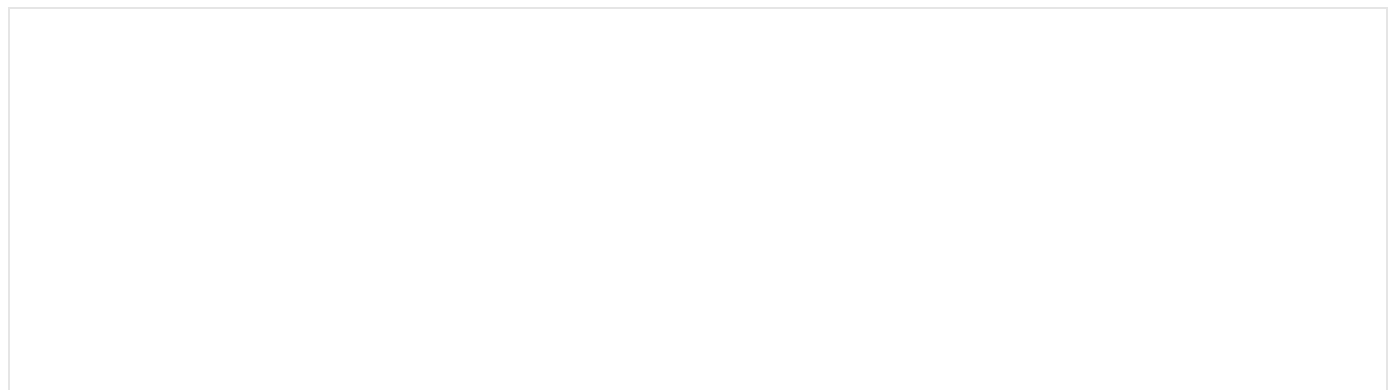

The City Council originally declined the use of ALPRs in 2019 pending a state audit into their usage — which found that the technology often lacked sufficient policy and audit oversight, according to a staff report.
