Mass Surveillance for... Loud Music? | EFFector 38.11

Across the country, surveillance companies have spun a vast web of tens of thousands of license plate cameras. The people selling this tech want you to believe that it's for your safety, but how are authorities really using automated license plate readers (ALPR)? In [this week's EFFector newsletter](#), we're looking at how these powerful surveillance networks have become universal people-trackers used for noise complaints and other low-level investigations.
