ORDER FORM

THIS ORDER FORM (this "**Order Form**") is made and entered into as of the Effective Date below between **Daly City Police Department** ("**Customer**") and **C3.ai, Inc.** ("**C3 AI**"). This Order Form is subject to the terms of the **Master Agreement** between C3 AI and Customer effective January 30, 2023 and incorporated herein by reference (the "**Master Agreement**"). C3 AI and Customer may also be referred to herein each as a "**Party**" and collectively as the "**Parties**." The capitalized terms used, but not defined, in this Order Form have the meanings set forth in the Master Agreement and the Product-Specific Terms referenced therein.

1. Commercial Terms

1.1. Effective Date: December 12, 2023 ("**Effective Date**")

1.2. C3 AI Subscription Term: Three (3) years commencing on the Effective Date and then optional annual renewals consistent with Table 2 not to exceed eight (years) from the Effective Date.

1.3. Deployment Infrastructure: Customer AWS Government Cloud Environment

2. Expansion Fee:

Table 1: C3 AI Subscription Fees*

C3 AI Services	Year 1	Year 2	Year 3
C3 AI Law Enforcement Subscription Fees[1,2] *Access for three In-Scope Police Departments*	$400,000	$400,000	$400,000
C3 AI Ex Machina Subscription Fees	$40,000	$40,000	$40,000
C3 AI Advisory Services Resources Fees[2]	$1,180,000	N/A	N/A
Number of Advisory Services FTE Resources	2.3	N/A	N/A
C3 AI Prioritized Engineering Services Fees[3]	Included	N/A	N/A
Total Annual Fees	**$1,620,000**	**$440,000**	**$440,000**
Total 3-Year Fees	**$2,500,000**		

*This Order Form is for the deployment of C3 AI Law Enforcement and C3 AI Ex-Machina applications to the San Bruno, San Mateo, and Daly City Police Departments ("In-Scope Police Departments").

[1]All pricing excludes AWS Government Cloud Hosting Fees.

[2]C3 AI Advisory Services see Exhibit A.

[3]C3 AI Prioritized Engineering Services see Exhibit B.

3. Fees and Payment Terms

A. C3 AI Subscription Fees

i. Total Fee: The Total Fee is $2,500,000 and is an irrevocable, nonrefundable commitment on the Effective Date. The Total Fee will be invoiced as follows: (i) $1,250,000 on the Effective Date and (ii) $1,250,000 upon the completion of the onboarding of the In-Scope Police Departments.

ii. C3 AI Monthly Subscription: C3 AI Ex Machina Subscription includes up to 105,000 vCPU hours per year for Daly City Police Department to support BSCC's ORT grant reporting requirements. Additional usage will be charged at $0.39 per vCPU hour and will be invoiced monthly in arrears.

iii. Renewals. After the initial three-year term, each In-Scope Police Department may renew on an annual basis the C3 AI Law Enforcement application subscription for the annual price set forth in Table 2. The renewal becomes an irrevocable, nonrefundable commitment on the effective date of the renewal Order.

B. Payment Terms. Invoiced charges under this Order are due net 30 days from the invoice date.

4. Additional Terms

A. Terms and Conditions. This Order is subject to (i) the terms of the Agreement; (ii) the execution of this Order no later than December 31, 2023, and C3 AI Installation Guides available at https://c3.ai/legal incorporated herein by reference.

B. Advisory Services. "Advisory Services" means those services C3 AI provides to the In-Scope Police Departments in accordance with the C3 AI Advisory Services description attached hereto as Exhibit A.

C. Prioritized Engineering Services. "Prioritized Engineering Services" means those services C3 AI provides to the In-Scope Police Departments in accordance with the Prioritized Engineering Services description attached hereto as Exhibit B.

D. Users. For purposes of this Order, Users shall mean the end-user employees of the San Bruno, San Mateo, and Daly City Police Departments. C3 AI Law Enforcement Subscription includes access not to exceed 480 end-users in total for the In-Scope Police Departments. Additional users will be charged at $100 per user per month.

E. Environment**.** Within 72 hours of the Effective Date, C3 AI will provide a URL to permit Customer access to the C3 AI Application in Customer's Hosting Services provider account ("**Customer Hosting Services Account**"). The C3 AI Subscription will be deemed accepted upon C3 AI's transmittal of the URL to Customer. Customer will comply with all set forth in the C3 AI Operational Controls description at www.c3.ai/legal. C3 AI's obligations under this Order Form are contingent upon Customer's compliance with the foregoing obligations.

F. CJIS Security Policy. C3 AI shall comply with the CJIS Policy at https://le.fbi.gov/file-repository/cjis_security_policy_v5-9-2_20221207-1.pdf/view.

G. Equal Employment Opportunity. C3 AI shall ensure equal employment opportunity based on objective standards of recruitment, classification, selection, promotion, compensation, performance evaluation, and management relations for all employees under this Agreement. C3 AI's equal employment policies shall be made available to the In-Scope Police Departments upon request.

H. Books and Records. Upon advanced notice from the Customer, C3 AI shall allow BSCC, the Federal awarding agency, the Comptroller General of the United States, or any of their duly authorized representative, access to any books, documents, papers and records of the contractor which are directly pertinent to the C3 AI Services for the purpose of making audits, examinations, excerpts and transcriptions.

I. Third-Party Data Sources. The In-Scope Police Departments shall be responsible for obtaining the right for C3 AI to access and use the Third-Party Data sources necessary for the performance of this Order Form.

J. Reimbursement of Expenses: Customer shall reimburse C3 AI at cost plus 15% for any reasonable and necessary expenses for travel and lodging incurred by C3 AI during the provision of C3 AI Services to Customer.

C3.ai, Inc.	**Daly City Police Department**
By_____	By_____
Name Derron Blakely	Name Cameron Christensen
Title General Counsel	Title Chief of Police
Date_____	Date_____

Table 2: Renewal Pricing for C3 AI Law Enforcement

Agency	Annual Renewal Fee
San Mateo Police Department	$73,000
Daly City Police Department	$62,000
San Bruno Police Department	$40,000

Exhibit A – Advisory Services

C3 AI will provide advisory services by a team of C3 Advisory Services FTE resources to provide assistance and guidance pertaining to C3 Applications, including tuning and/or updating the C3 AI Application data science models. "**C3 AI Advisory Services FTE**" means a full-time equivalent professional resource for up to 2000 person hours per annum. The C3 AI Advisory Services team may be located in Redwood City, CA or other C3 AI US locations, at C3 AI's discretion.

1. **C3 AI Advisory Services Resources.**
   C3 AI will staff the C3 AI Advisory Services purchased under the Order Form with the number of C3 AI Advisory Services FTE resource(s) specified in the applicable Order Form, on a fixed-fee annualized basis during each year of the Subscription Term. The type of C3 AI Advisory Services FTE resource may change depending on the stage of C3 AI Advisory Services engagement. Any C3 AI Advisory Services FTE hours over the number specified in the herein are subject to additional fees. Additional C3 AI Advisory Services FTEs hours over the number specified in the Order requires execution of an additional order.

2. **Data Science Model Tuning and Updates**
   C3 AI Advisory Services FTEs will periodically tune and/or update the C3 AI Application data science model. The trigger for the tuning and/or update will be jointly decided with the County during the project implementation.

3. **Project Governance and Limitations.**

   a. C3 AI and In-Scope Police Departments will each designate an executive sponsor to manage the relationship under the Order Form. C3 AI and In-Scope Police Departments will ensure that the appropriate representatives from each party (the "**Executive Leadership Committee**") participate in quarterly In-Scope Police Department product road map and project review meetings. A quarterly executive status report will be created by C3 AI Advisory Services project leads and shared at the quarterly meeting.

   b. Formal C3 Advisory Services project reviews will be conducted monthly by the In-Scope Police Departments and C3 AI team leadership.

   c. The Parties agree the C3 AI Advisory Services FTE hours will be distributed reasonably evenly over the annual C3 AI Advisory Services Subscription Term unless a specific project plan has been agreed requiring a different distribution of resources.

   d. The following professional services are outside of the scope of the services provided in the C3 AI Advisory Services: post-launch enhancements, customizations, and implementation services. For clarification, Advisory Services includes delivering the objectives in Section 4 below, including configuring feature enhancements (see 4.d).

4. **C3 AI Advisory Services Initial Objectives**
   The Parties have designated an initial objective for the C3 AI Advisory Services FTEs. In-Scope Police Departments may change the overall objective of the C3 AI Advisory Services FTEs during the Subscription Term, in coordination with C3 AI and subject to the remaining available C3 AI Advisory Services FTE resources ordered in the Order Form. As of the Effective Date, the joint objectives are:

   a. Historical and live integration of up to four (4) source systems from the San Mateo Police Department's and San Bruno Police Department's records management system, computer-aided dispatch system, and two (2) license plate reader systems.

   b. Historical and live integration of up to two (2) license plate reader systems from Daly City Police Department

c. Historical and live integration for an additional three (3) data sources from other law enforcement agencies or 3rd party vendors. Each PD, at their cost, is responsible for securing the necessary rights for C3 AI to access and use 3rd party data for this agreement

d. Configuring up to eight (8) feature enhancements of C3 AI Law Enforcement, to be determined by the In-Scope Police Departments in alignment with C3 AI

e. Configuring role-based access controls to enable cross-agency data sharing

f. Full integration testing, quality assurance testing, performance testing, and User acceptance testing

g. Onboarding and training of new end-users onto C3 AI Law Enforcement – up to five (5) in-person training sessions for each police department

Data Requirements

During the Deployment, C3 AI shall integrate historical data and setup live integrations with the following data sources. Historical data for each data source shall be up to 1TB. Should any data source not be available or provided through a separate agreement, C3 AI will substitute with another data source(s) or application enhancement(s) requiring similar level of effort to complete in agreement with the In-Scope Police Departments. In-Scope Police Departments are responsible for facilitating access to these data sources:

- Up to four (4) data sources from San Mateo and San Bruno Police Departments as listed in Table 3
- Up to two (2) data sources from Daly City Police Department, including the Flock and Axon Fleet license plate reader systems
- Up to three (3) data sources from other law enforcement agencies or 3rd party vendors.

Table 3. Police Department's In-Scope Data Sources*

Type of Data (System Name)	Description	Expected Data format	Maximum Number Included
Records Management System (i.e., RIMS)	Police department's information, records, documents, or files pertaining to law enforcement operations.	CSV	1
Computer Aided Dispatch (i.e., Versaterm, RIMS)	Police department's dispatch system data for emergency response (e.g., 911 calls)	CSV	1
License Plate Reader (i.e., Flock, Vigilant, Axon, Boss)	License plate reader data (note: subject to availability of license)	API or JSON	2

*Services to integrate an in-scope data source may be exchanged for equivalent services scope in alignment with C3 AI. Each In-Scope police department is responsible for providing C3 AI the right to access and use of 3rd Party Data at their cost. Exact data sources are to be confirmed during deployment.

Proposed Deployment Plan

C3 AI will begin with an initial setup of RIMS CAD and porting the data source into the C3 AI Law Enforcement data model, and then begin onboarding the In-Scope Police Departments.

Following agency onboarding, C3 AI will configure up to eight (8) feature enhancements to the C3 AI Law Enforcement Application, and integrate up to three (3) additional data sources, over the remaining twelve (12) month period.

As each law enforcement agency goes-live, C3 AI will also conduct up to five (5) end-user onboarding and training sessions.

The required C3 AI and law enforcement agency resources, roles, and responsibilities for the rollout are shown in Table 4 below.

Figure 1: Proposed Rollout Plan for C3 AI Law Enforcement

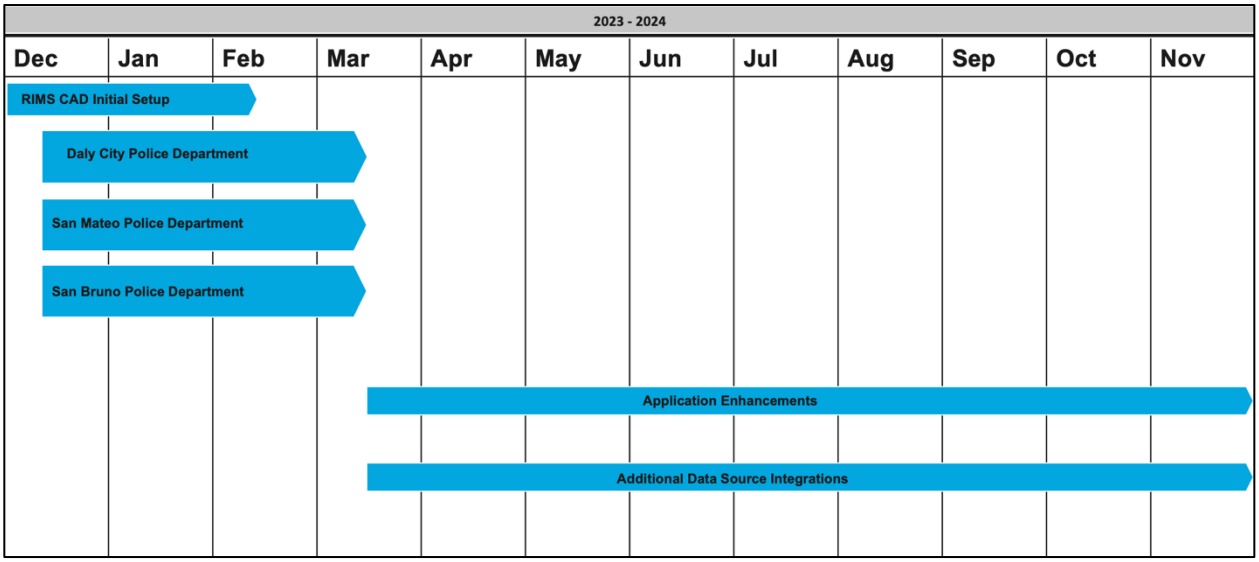

Table 4: Required C3 AI & Law Enforcement Agency Resources

Team	Role	Responsibilities
C3 AI	Executive Sponsor	Ensure overall project direction, unblock issues
	Project Manager 0.3 FTE	Manages the day-to-day activities of Project team
	Solutions Engineer 1.6 FTE	Performs data integration, supports machine learning, configures application user interface
	Solution Architect 0.25 FTE	Performs data integration and ensures environment readiness for application expansion
Law Enforcement Agency / Police Department	Executive Sponsor	Ensure overall project direction, unblock issues
	Project Management 1 individual throughout the project (4-8 hours per week)	Day-to-day project operations and co-ordination with other resources and groups
	IT/Systems Resource (1-2 hours per week during the first 4 weeks)	Supports extraction of required data, and integration to source systems
	Subject Matter Expert 1-2 individuals (1-2 hours per week during first 8 weeks)	Join and participate actively in weekly meetings to provide required subject matter expertise and feedback through the project

Exhibit B: Prioritized Engineering Services

C3 AI will provide prioritized engineering services to produce the three (3) features described in the table below in the C3 AI Law Enforcement Application (the "Prioritized Engineering Services").

Prioritized Feature	Feature Description
User Interface Optimizations	The C3 AI Law Enforcement component library will be updated with the newest visualizations that may be used for custom card lists, enhanced modals for previewing links, and clearer graphs for analysis.
Vehicle Detail Page	C3 AI Law Enforcement will support detail pages specific to vehicles. Each unique vehicle will receive a detail page that contains a summarized view of all connected cases, identities, citations, and license plate reader media.
Vehicle Detail Page Connections	Following the creation of the Vehicle Detail page, link to this detail page across existing mentions of vehicles within Identity and Case Detail pages. Additionally, expand Investigations functionality to allow Vehicle additions.

1. **Prioritized Engineering Services**

Prioritized Engineering Services are services targeted to developing specific new features for the C3 AI Law Enforcement Application targeted to the In-Scope Police Department's needs. These features are already on the C3 AI product roadmaps but are prioritized based on such need ("Prioritized Features"). The resulting features become part of C3 AI Products, available to the In-Scope Police Departments. The Prioritized Features are C3 AI Materials and are the intellectual property of C3 AI. For a full list of potential future C3 AI roadmap features, see Exhibit C.

2. **Development Roadmap**

C3 AI will use commercially reasonable efforts to develop and maintain the specified Prioritized Feature as part of the corresponding C3 AI Product.

The In-Scope Police Departments and C3 AI shall collaboratively define functional and non-functional requirements for the C3 AI Prioritized Feature. Once requirements are defined with the In-Scope Police Departments, C3 AI will manage the feature specification, development, testing, and release of the Prioritized Feature. C3 AI will provide the In-Scope Police Departments with monthly reports on development progress and will be reasonably available for update meetings and consultation on progress throughout the development period.

3. **Delivery and Acceptance**

The Prioritized Feature shall be considered accepted upon delivery of the feature. Any performance issue or alleged defect in a completed feature that has been delivered shall be handled through the standard warranty and support terms and process set forth in the Agreement.

Exhibit C: C3 AI Roadmap

The table below details a list of potential future features on C3 AI's roadmap:

Feature Name	Feature Description
Data Model Migration and Framework Improvements	Convert C3 AI Law Enforcement application to the latest C3 AI platform to enable application data science and architecture automation. Version 8 provides reusable, connected components for full data science lifecycle.
Upgraded Data Integration	Standardize data integration across existing and future third-party and law enforcement agency sources. Enable flexible cloud infrastructure deployments.
Enhanced Identity Overview Page	The C3 AI Law Enforcement Identity Overview page will be enhanced to the optimal user interface. The new format will support increased readability among densely populated fields and summaries of key information.
Environment Scale Optimizations	C3 AI Law Enforcement will be upgraded to improve development performance, stability, and reliability for county-wide expansion. The newest developer package ensures faster feature visibility for end-users.
Search Consolidation	The Search and Advanced Search functionality across Cases and Identities will be consolidated to a single tabbed page for a more intuitive user experience and faster investigations across multiple data types.
Search Justification	C3 AI Law Enforcement will implement a user interface "Search Justification" field plus workflow logic to capture per-user searches with justifications. The justification log will be available in search history per user.
Computer Aided Dispatch Case Links	Case details pages with confirmed links to Computer Aided Dispatch records will have a new dispatch tab populated with relevant information. These related dispatch records will be indexed for case search and have options for advanced case search.
Dispatch Detail Panels	For Computer Aided Dispatch information with no confirmed case connection, detail panels will be available throughout application for summaries of the call-for-service information.
Blackboard Network Graph Enhancements	The Blackboard advanced network graph will surface evidence packages indicating the specific record linking two individuals. This will be accompanied by C3 AI Data Vision user interface enhancement.
Blackboard New Relationship Types	To create a more robust advanced network graph, additional connection types between identities will be surfaced on Blackboard. This will be accompanied by graph enhancements for computational efficiency.
Dashboard Event Map Improvements	The Dashboard Event Map user experience will be improved with higher fidelity control via new filters, selection tools, and map overlays. Dashboard events will have additional officer awareness indicators.
Dashboard Analysis Screen	The Dashboard page will be expanded to include an Analysis tab that automates statistical reporting requirements such as month-to-month event changes and allows for simple filtering and exports across jurisdictions.
User Interface Optimizations	The C3 AI Law Enforcement component library will be updated with the newest visualizations that may be used for custom card lists, enhanced modals for previewing links, and clearer graphs for analysis.
Vehicle Detail Page	C3 AI Law Enforcement will support detail pages specific to vehicles. Each unique vehicle will receive a detail page that contains a summarized view of all connected cases, identities, citations, and license plate reader media.
Vehicle Detail Page Connections	Following the creation of the Vehicle Detail page, link to this detail page across existing mentions of vehicles within Identity and Case Detail pages. Additionally, expand Investigations functionality to allow Vehicle additions.
