TERMS & CONDITIONS

Tax is estimated based on rates applicable at date of quote and subject to change at time of invoicing. If a tax exemption certificate should be applied, please submit prior to invoicing.

Contract Omnia Contract 3544-21-4615 is incorporated by reference into the terms and conditions of this Agreement. In the event of conflict the terms of Axon's Master Services and Purchasing Agreement shall govern.

STANDARD TERMS AND CONDITIONS

Axon Master Services and Purchasing Agreement:
This Quote is limited to and conditional upon your acceptance of the provisions set forth herein and Axon's Master Services and Purchasing Agreement (posted at https://www.axon.com/sales-terms-and-conditions), as well as the attached Statement of Work (SOW) for Axon Fleet and/or Axon Interview Room purchase, if applicable. In the event you and Axon have entered into a prior agreement to govern all future purchases, that agreement shall govern to the extent it includes the products and services being purchased and does not conflict with the Axon Customer Experience Improvement Program Appendix as described below.

ACEIP:
The Axon Customer Experience Improvement Program Appendix, which includes the sharing of de-identified segments of Agency Content with Axon to develop new products and improve your product experience (posted at www.axon.com/legal/sales-terms-and-conditions), is incorporated herein by reference. By signing below, you agree to the terms of the Axon Customer Experience Improvement Program.

Acceptance of Terms:
Any purchase order issued in response to this Quote is subject solely to the above referenced terms and conditions. By signing below, you represent that you are lawfully able to enter into contracts. If you are signing on behalf of an entity (including but not limited to the company, municipality, or government agency for whom you work), you represent to Axon that you have legal authority to bind that entity. If you do not have this authority, please do not sign this Quote.

EXCEPTIONS TO STANDARD TERMS AND CONDITIONS

Rewrite Estimates
Estimated Amounts and Contract Terminations. Any amounts stated as due under existing or terminated contracts — including contract transfer balances carried forward to new or pending contracts — are estimates based on payments received as of the calculation date. These estimates may be adjusted if new contracts are not executed on the anticipated dates or if expected payments are not made.

Refresh Shipment Timing
Technology Assurance Plan (TAP) Refresh Prior to Renewal. For Customers with expiring agreements that include TAP refresh rights, Axon may, in its discretion, ship refresh hardware under the existing contract while renewal or replacement agreements are in progress. Any such shipments will be deemed made under the terms of the existing contract until the new contract is fully executed, after which any applicable updates, fees, or adjustments will apply.

Shipment Timing
Shipment Variance . Estimated shipment dates are provided for planning purposes only and are not guarantees. Axon may ship hardware before or after the estimated shipment date, and failure to meet an estimated shipment date will not, by itself, constitute a breach, provided Axon uses commercially reasonable efforts to meet estimated shipment dates.

OUTPOST SOW

1. Purpose

This Statement of Work ("SOW") outlines the scope, responsibilities, and installation details for Axon as part of the Customer's purchase of Axon Outpost. This SOW operates under the terms of the Agreement. All capitalized terms in this SOW shall have the same meaning as the Agreement.

2. Scope of Work

Axon and Axon authorized subcontractors will install and maintain Axon Outpost on selected Customer owned properties.

3. Installation Location

Customer grants Axon the right to install and maintain Axon Outpost at location sites approved by Axon.

3.1. If location sites have not been selected or assessed at the time of contract signature, Axon reserves the right to invoice the Customer for additional install complexities not accounted for in the initial quote.

4. Installation, Validation, and Support

4.1. Site Selection and Assessment. Axon will support site selection and assessment. Assessments may be conducted virtually or in-person and may include confirmation of visibility/coverage, cellular strength, solar feasibility, and access to AC power sources.

4.1.1. For all existing infrastructure installation sites, Customer is responsible for condition of existing infrastructure.

4.1.2. If during a site walk it has been deemed that an installation is more complex than initially quoted, Axon reserves the right to invoice Customer for the additional cost of installation.

4.1.3. If Axon deems a selected location site is not suitable for installation, a new site must be selected and assessed.

4.2. Permitting. Axon will assist with obtaining the necessary local, state, or Federal approvals before installing Outpost. All permitting fees are the responsibility of the customer. All permit licenses will be in the name of the customer.

4.3. Installation. Axon will install all Axon Outpost hardware and agreed-upon pole (where applicable).

4.3.1. Solar Sites. For sites with solar power, Axon will: (a) install the Outpost camera, battery, and solar panel; (b) ensure the camera is connected to power and LTE; (c) ensure the camera is set at the optimal capture angle; (d) ensure the panel is installed for optimal sun exposure.

4.3.2. AC Sites. For sites with AC power, Axon will: (a) install the Outpost camera and AC adapter; (b) ensure the camera is set at the optimal capture angle. Axon will not conduct any electrical work to connect the AC adapter to power. The customer may work with a licensed electrician to connect the camera to power. Or, If requested, the customer may request for Axon to coordinate with a licensed electrician for an additional cost.

4.3.3. Existing Infrastructure Installations. If selected infrastructure has existing camera(s), Axon will remove the hardware before installing Outpost. Axon will not dispose of equipment, repair any surfaces or structures, or remove underground cables or conduit.

4.3.4. Standard and Advanced Installations. For Standard or Advanced installations, Axon will install a breakaway or MASH approved pole, respectively. Axon will call 811 prior to installation.

4.3.5. DOT Pole Installation Service. Axon will install Outpost on existing DOT poles and ensure compliance with DOT guidelines. Axon will not install DOT poles.

4.3.6. Complex Location Sites. Complex location sites require a custom SOW and include, but are not limited to, toll booths, bridges and overpasses, federal or military land, areas with restricted access or high security, flood zones, railway crossing, mountainous or hilly terrain.

4.3.7. Exclusions. Installation services do not include the following, unless specifically scoped in a custom SOW: electrical work, concrete drilling, bucket truck or non-standard equipment rental, trenching, tree trimming, custom engineered drawings or traffic plans, traffic control beyond basic MUTCD traffic control, environmental impact studies.

5. Power Requirements

5.1. AC-Powered Sites. Axon will provide all necessary equipment compatible with standard AC power configurations. Customer is responsible for contracting a licensed electrician to ensure installation meets NEC (National Electrical Code) standards and the power must be continuous and non-switched to support uninterrupted system operation; all electrical work must comply with local codes and safety regulations.

5.2. Solar-Powered Sites. Installation sites must offer unobstructed southern exposure to maximize solar efficiency. Axon will assess solar viability during site assessment, including shading, positioning, and mounting considerations. Customer will ensure the selected location sites must maintain direct, unobstructed visibility to the sky to ensure consistent solar energy capture. Customer agrees to help maintain environmental conditions that support reliable solar performance (e.g., minimizing nearby shade, vegetation growth).

6. Traffic Control

Axon will provide basic MUTCD traffic control and provide necessary traffic signs, cones, and temporary barriers.

7. Dependencies and Potential Delays

Installation is subject to but not limited by the following factors, which may affect scheduling and completion: delays due to local permitting requirements or jurisdictional approvals; availability and completion of necessary electrical work at the installation site (for AC-powered setups); coordination with Customer and subcontractors, including restricted hours or special access requirements; weather-related delays that may impact site safety or installation feasibility; or any site-specific safety protocols or regulatory requirements that must be satisfied prior to deployment.

8. Training and Onboarding

Axon's team will provide hands-on training for relevant personnel, user credentials and access to supporting applications, and operational guidance tailored to the current system configuration.

9. General Responsibilities

9.1. Axon will: (a) install, configure, and maintain all hardware at designated location site; (b) validate system power, connectivity, and functionality of Outpost; (c) integrate Outpost with Fusus, including NCIC and state hotlists; and (d) will provide training, documentation, and technical support to Customer personnel.

9.2. Customer will: (a) fund and maintain all legally required permits, authorizations, and/or licensing to place, maintain, and/or remove the Outpost at the installation sites; (b) ensure access to installation sites, support device placement communication, and coordinate internally (e.g., facilities, IT, legal, public safety) to facilitate deployment; (c) support scheduling for permitting and local compliance requirements; (d) designate a primary and backup point of contact; and (e) support site selection, utility clearance, and installation approvals.
