RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive records to this request. Due to the large volume of emails, we are releasing records on a rolling basis. A good faith and diligent search yielded no records responsive to your request. If any responsive records are located, we will further respond to your request with updates no later than 11/3/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Juliana Santiago

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the

End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the

substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, we are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. The next batch of records has been released and made available on the San Mateo Records Request Portal. You will be receiving more batches of responsive records in the future. Select the link below to view what is currently available.

We will further respond to your request with updates no later than 10/20/26.

If you have any questions, please contact me using the below contact information.

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to

SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing

justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, we are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. The next batch of records has been released and made available on the San Mateo Records Request Portal. You will be receiving more batches of responsive records in the future. Select the link below to view what is currently available.

Please note that portions of your request are being withheld pursuant to Government Code section 7923.600, as they constitute law-enforcement investigative records.

We will further respond to your request with updates no later than 9/6/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Juliana Santiago

RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search

activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive records to this request. Due to the large volume of emails, we are releasing records on a rolling basis. A good faith and diligent search yielded no records responsive to your request. If any responsive records are located, we will further respond to your request with updates no later than 9/22/26.

If you have any questions, please contact me using the below contact information.

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive records to this request. Due to the large volume of emails, we are releasing records on a rolling basis. A good faith and diligent search yielded no records responsive to your request. If any responsive records are located, we will further respond to your request with updates no later than 9/8/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i)

searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, we are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. The next batch of records has been released and made available on the San Mateo Records Request Portal. You will be receiving more batches of responsive records in the future. Select the link below to view what is currently available.

We will further respond to your request with updates no later than 8/25/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Jennifer Maravillas

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number

of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest

date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive records to this request. Due to the large volume of emails, we are releasing records on a rolling basis. A good faith and diligent search yielded no records responsive to your request. If any responsive records are located, we will further respond to your request with updates no later than 8/11/26.

If you have any questions, please contact me using the below contact information.

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or

justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive records to this request. Due to the large volume of emails, we are releasing records on a rolling basis. A good faith and diligent search yielded no records responsive to your request. If any responsive records are located, we will further respond to your request with updates no later than 7/28/26.

If you have any questions, please contact me using the below contact information.

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches

against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive records to this request. Due to the large volume of emails, we are releasing records on a rolling basis. A good faith and diligent search yielded no records responsive to your request. If any responsive records are located, we will further respond to your request with updates no later than 7/14/26.

If you have any questions, please contact me using the below contact information.

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least

October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, we are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. A batch of records has been released and made available on the San Mateo Records

Request Portal. You will be receiving more batches of responsive records in the future. Select the link below to view what is currently available.

We will further respond to your request with updates no later than 6/30/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Juliana Santiago

Subject: California Public Records Request :: W012320-031126
Body:
Dear Brian C,

This message is in response to your comments submitted on 6/2/26.

Ms. Santiago, Thank you for the June 2 update, which indicated a rolling email search is underway for Items 2(d) and 2(e), with a next update by June 16, 2026. To assist the Department's continued review, I'd appreciate clarification on the following. Scope of the email search. The response refers to "responsive emails to this request" and "the large volume of emails." Could the Department specify which email corpus is being searched (e.g., SMPD all-staff email, a custodian list of specific personnel, or ALPR-related correspondence only)? I ask because the records responsive to Items 2(d)–(e) — records of searches flagged or documented as non-compliant, notifications sent to a searching user or agency, referrals for disciplinary review, and changes to system access — would be internal SMPD records and communications, not emails from Flock or any other vendor. A search confined to vendor correspondence would not surface them.

Internal communications are being reviewed.

As you were notified in #W012597-042226 and #W012686-050726, records pertaining to search methodology are exempted under California Government Code section 7927.705 which exempts records protected by privileges under the Evidence Code. This includes attorney-client privileged communications pursuant to California Evidence Code section 954.

Non-email records. As you are aware, several of these record types would not exist as emails at all — for example, system flags or logs documenting non-compliant searches, records of access-control changes, and any audit memoranda or compliance reports produced under SOP 205.5.1. Is the responsive-records search for Items 2(d)–(e) limited to email records, or are non-email records also being searched? If the search is limited to emails, please confirm that non-email records responsive to these items do not exist.

If responsive records exist, they would be provided as email correspondence which are being

continuously reviewed. Responsive documents are being provided to you on a rolling basis.

Policy 463.10 — pointer for the search. Policy 463.10 (effective December 22, 2025) requires that audit memoranda "and any associated documentation" be "filed and retained" after the Chief's review. The "associated documentation" referenced by the Casazza monthly memos (W012461) may be a useful place to look for records responsive to Items 2(d)–(e). Are those documents within the W012320 search scope?

Yes, these internal communications are included in the scope of this request.

Remaining parts of Item 1. The Department's May 20 response indicated that Items 1(a) and 2(a) are being produced on a rolling basis under W012541-041426. I don't see a corresponding disposition for the rest of Item 1: 1(b) (quarterly operator audits, which SOP 205 has required since at least October 25, 2019) and 1(c) (audit results submitted to the Support Services Captain per SOP 205.5.1). The Department's original response stated that all audit records maintained by the Department had been produced under W012129-020926. Since Items 1(a) and 2(a) are now being produced separately under W012541, are Items 1(b) and 1(c) likewise being produced under W012541, or does the Department maintain that responsive records for those items were already satisfied by W012129? Thank you, Brian

Audit records maintained by the Department have been provided to you under requests #W012129-020926, #W012461-042226 and W012666-050426.

Internal search audits are being provided to you on a rolling basis under request #W012541-041426.

As you were notified under request #W012674-050426, records regarding specific individual operators and user-account history reflect search activity conducted by law enforcement in connection with criminal investigations. Each entry documents the existence, timing, and nature of an investigative act by the agency, including the category of criminal offense under investigation and the time frame of the search. Disclosure of these records would reveal confidential investigative activity. These records are therefore exempt from disclosure as investigatory records compiled by a law enforcement agency for law enforcement purposes pursuant to Government Code section 7923.600, subdivision (a).

If any additional responsive records are in located this review, they will be provided to you under this rolling release.

If you have any questions, please contact me using the below contact information.

Sincerely,

Juliana Santiago

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive emails to this request (Items 2(d)-(e)). Due to the large volume of emails, we are releasing records on a rolling basis. A good faith and diligent search yielded no records responsive to your request. If any responsive records are located, we will further respond to your request with updates no later than 6/16/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Juliana Santiago

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number

was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive emails to this request (Items 2(d)-(e)) however due to the large volume of emails, this will take time. We are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. At this time there are no responsive records to your request. If any responsive records are located, we will further respond to your request with updates no later than 6/3/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Juliana Santiago

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

In response to your comment received on 5/6/2026, items 2(d)-(e) generated a substantial number of files requiring staff review. As stated under request #W012320-031126 on 3/17/2026, this will take an extensive amount of time to search and will be provided on a rolling basis. This review has nothing to do with request W012462-040226. Emails are being reviewed under differing criteria based on your request submitted here #W012320-031126.

The determinations made to you on 3/17/2026 are final and are not being revisited under #W012462-040226 which you withdrew from on 5/6/2026.

Following further review, internal search audits are being provided to you on a rolling basis under request #W012541-041426 (Items 1(a) and 2(a)).

In regard to items 2(b) and (c), the California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. The report you seek does not exist as a record maintained by the Department or within the Flock platform.

As stated to you on 3/17/2026 under this request and additionally under Reference # W012665-0450426, external search audits discussed under Item 3(a) reflect search activity conducted by law enforcement agencies in connection with criminal investigations. Each log entry documents the existence, timing, and nature of an investigative act by another agency, including the category of criminal offense under investigation and the time frame of the search. Disclosure of these records would reveal confidential investigative activity. These records are therefore exempt from disclosure as investigatory records compiled by a law enforcement agency for law enforcement purposes pursuant to Government Code section 7923.600.

Referring to 3(b) as stated to you on 3/17/2026, the California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. The report you seek does not exist as a record maintained by the Department or within the Flock platform.

As stated, we will continue to review for items 2(d)-(e) and when responsive records are located, they will be provided to you. You will continue to be updated on review status as done on 3/26/26, 4/8/26, 4/22/26, and 5/6/26.If you have any questions, please reply to this message.

Sincerely,

Juliana Santiago

On 5/6/2026 5:06:58 PM, Brian C wrote:

Captain Maravillas,

Thank you for the 5/6 update. I wanted to seek clarification on which items are being addressed through the W012462 rolling production.

The original request expressly asked that "if any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items." Government Code § 7922.000(a) similarly requires the agency to identify with particularity the basis for withholding each record. The Department's 3/17 and 4/8 responses followed this structure — responding to each sub-item individually with specific exemptions cited.

Earlier responses provided specific final answers on several items: Items 1(a) and 3(a) were denied under § 7923.600 and § 1798.90.55(b); Items 2(a)–(c) and 3(b) were declined as records that do not exist. Items 2(d)–(e) were the items flagged as potentially having responsive emails. The 5/6 update applies a single email-volume deferral to the entire request without distinguishing between items already addressed on other grounds and items genuinely dependent on the email search.

I also want to note that W012462-040226 is scoped to emails received from @flocksafety.com and @mail.flocksafety.com. Any responsive emails to this request — records of non-compliant searches, corrective action notices, or audit results submitted to the Support Services Captain — would be internal SMPD communications, not vendor emails, and would not appear in the W012462 corpus.

Are the § 7923.600 and "not an existing record" responses the city's final position on Items 1(a), 2(a)–(c), 3(a), and 3(b)? Or is the city revisiting those under the W012462 review? If the earlier denials stand, I'd ask the city to confirm that in writing, item by item, so the record reflects what remains open.

Thanks,
Brian

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure

205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist

but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive emails to this request, however due to the large volume of emails, this will take time. We are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. At this time there are no responsive records to your request. If any responsive records are located, we will further respond to your request with updates no later than 5/20/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Jennifer Maravillas

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, there may be responsive emails to this request, however due to the large volume of emails, this will take time. We are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. At this time there are no responsive records to your request. If any responsive records are located, we will further respond to your request with updates no later than 5/6/26.

If you have any questions, please contact me using the below contact information.

Sincerely,

Jennifer Maravillas

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

As previously mentioned by Kelly O'Keefe on 3/17/26, this data constitutes records of investigation and/or intelligence and therefore is exempt from release under Cal. Government Code section 7923.600. In addition, your request has been denied pursuant to Government Code 7927.705, as records prohibited from disclosure under federal or state law. In this case, Civil Code section 1798.90.55, subdivision (b) prohibits a public agency from selling, sharing, or transferring ALPR information, except to another public agency, and only as otherwise permitted by law.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

All audit records maintained by the Department were provided to you at your request

#W012129-020926.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

All audit records maintained by the Department were provided to you at your request #W012129-020926.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

All audit records maintained by the Department were provided to you at your request #W012129-020926.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

The California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. As previously mentioned by Kelly O'Keefe on 3/17/26 the report you seek does not exist as a record maintained by the Department or within the Flock platform.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

The California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. As previously mentioned by Kelly O'Keefe on 3/17/26, the report you seek does not exist as a record maintained by the Department or within the Flock platform.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

The California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. As previously mentioned by Kelly O'Keefe on 3/17/26, the report you seek does not exist as a record maintained by the Department or within the Flock platform.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

There may be responsive emails associated with this request. This will take an extensive amount of time to search and will be provided on a rolling basis. As you are aware, we are releasing records on a rolling basis to show a good faith and diligent effort to complete your request. At this time there are no responsive records to your request. If any responsive records are located, we will further respond to your request with updates no later than 4/22/26.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Captain Maravillas,
Thank you for the update, and I understand records are being released on a rolling basis.
I want to flag that my latest message was a reply to Ms. O'Keefe's earlier response, which denied several items on the basis that the department cannot create records. My reply offered alternative paths — particularly for Items 2 and 3 — that wouldn't require creating anything, such as existing Flock platform exports and aggregate data the system already generates.
I'd appreciate it if each item could be addressed individually when the rolling responses continue, particularly where the response differs from "no responsive records." The request specifically asked for separate responses per item with legal bases for any denials.
Happy to discuss by phone if it would be helpful to walk through the context.
-brian

RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request from you on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the

Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

As you are aware, we are releasing records on a rolling basis to show a good faith and diligent effort to

complete your request. At this time there are no responsive records to your request. If any responsive records are located, we will further respond to your request with updates no later than 4/11/26.

If you have any questions, please contact me using the below contact information.

On 3/24/2026 5:03:01 PM, Brian C wrote:

TO: "San Mateo Public Records Center"[sanmateoca@mycusthelp.net]
Kelly,

Thank you for the itemized response. I have follow-ups on several items.

Item 1(a) — End-user audit records: Denied as records of investigation (§ 7923.600) and ALPR information (§ 1798.90.55(b)). Access logs are administrative records documenting system usage — not "information or data collected through the use of an ALPR system" as defined in § 1798.90.5(b). The California Supreme Court in ACLU v. Superior Court (2017) 3 Cal.5th 1032 held that ALPR data collected through mass scanning is not exempt as records of investigation because it "is not conducted as part of a targeted inquiry into any particular crime." Administrative logs of who accessed the system are further removed from any investigation than the scan data the court addressed. Government Code § 7922.525 requires disclosure of reasonably segregable non-exempt portions. I request the access logs the department confirmed on March 5, 2026 it maintains through Flock, with the following fields redacted: license plate numbers or vehicle descriptions searched, search results returned, and any information identifying the subject of an investigation. The remaining fields — date/time, username, agency affiliation, and whether a case number was entered — cannot identify any vehicle, person, or investigation.

Item 1(b)–(d) — Operator audit records and audit results: Response states all audit records were provided via W012129-020926. Those records are three sharing configuration memos reviewing user counts and sharing settings. My request specifically noted that sharing configuration memos would not be responsive to a request for search activity audit records. These memos also do not appear to satisfy the department's own Policy 463.10 audit requirements, which call for monthly internal audits and quarterly external audits — not solely a review of sharing toggles. Can

you confirm that no audit records exist beyond the three Casazza memos previously produced?

Item 2(a)–(c) — Aggregate search counts: Denied as not an existing record. Flock's platform maintains search audit logs with fields including date, time, username, case number, and offense type. An export of these logs is an existing record — not a new compilation. Aggregate counts derived from these logs are not "information or data collected through the use of an ALPR system" under § 1798.90.5(b). They are administrative metadata about system usage that cannot identify any vehicle, person, or investigation. The California State Auditor published equivalent aggregate ALPR statistics in Report 2019-118 — if this data were ALPR information, that publication would have violated § 1798.90.55(b). I am willing to accept the raw search audit log export with plate numbers and search results redacted per § 7922.525.

Item 2(d)–(e) — Non-compliant searches and corrective actions: Noted that responsive emails may exist and will be provided on rolling basis. Thank you — I look forward to receiving those.

Item 3(a) — Names of agencies that searched SMPD data: Denied as records of investigation (§ 7923.600) and ALPR information (§ 1798.90.55(b)). An agency name is not "information or data collected through the use of an ALPR system" under § 1798.90.5(b). It does not reveal the subject, target, or substance of any investigation. The department already publicly discloses which agencies have access through the Flock transparency portal. The names of agencies that have used that access are no more sensitive. The ACLU v. Superior Court holding that mass-scanned ALPR data is not investigative applies with even greater force to a list of agency names. I would accept a log containing only agency names with all other fields redacted.

Item 3(b) — Search counts by agency: Denied as not an existing record. As with Item 2, I am willing to accept a raw search audit log export with plate numbers, search results, and dates redacted per § 7922.525. Even a log containing only agency name and whether a case number was entered would satisfy this request without requiring the department to compile a new record. These fields are administrative metadata, not ALPR information under § 1798.90.5(b), and cannot reveal the subject, target, or substance of any investigation.

Subject: California Public Records Request :: W012320-031126
Body:

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

This data constitutes records of investigation and/or intelligence and therefore is exempt from release under Cal. Government Code section 7923.600. In addition, your request has been denied pursuant to Government Code 7927.705, as records prohibited from disclosure under federal or state law. In this case, Civil Code section 1798.90.55, subdivision (b) prohibits a public agency from selling, sharing, or transferring ALPR information, except to another public agency, and only as otherwise permitted by law.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

All audit records maintained by the Department were provided to you at your request #W012129-020926.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

All audit records maintained by the Department were provided to you at your request #W012129-020926.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

All audit records maintained by the Department were provided to you at your request #W012129-020926.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was

populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

The California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. The report you seek does not exist as a record maintained by the Department or within the Flock platform.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

The California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. The report you seek does not exist as a record maintained by the Department or within the Flock platform.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

The California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. The report you seek does not exist as a record maintained by the Department or within the Flock platform.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

There may be responsive emails associated with this request. This will take an extensive amount of time to search and will be provided on a rolling basis.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

There may be responsive emails associated with this request. This will take an extensive amount of time to search and will

be provided on a rolling basis.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

This data constitutes records of investigation and/or intelligence and therefore is exempt from release under Cal. Government Code section 7923.600. In addition, your request has been denied pursuant to Government Code 7927.705, as records prohibited from disclosure under federal or state law. In this case, Civil Code section 1798.90.55, subdivision (b) prohibits a public agency from selling, sharing, or transferring ALPR information, except to another public agency, and only as otherwise permitted by law.

(b) The total number of searches conducted by each such agency.

The California Public Records Act requires disclosure of existing identifiable records only and does not require an agency to create a new record, compile information, or answer questions in response to a request. The report you seek does not exist as a record maintained by the Department or within the Flock platform.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

TO: "San Mateo Public Records Center"[sanmateoca@mycusthelp.net]
Kelly,

Thank you for the response. I have a few questions about the exemptions cited.

Regarding § 7923.600 (investigation records): In ACLU Foundation of Southern California v. Superior Court (2017) 3 Cal.5th 1032, the California Supreme Court held that ALPR data collected through mass scanning is not exempt as "records of investigations" because it "is not conducted as part of a targeted inquiry into any particular crime." If

raw plate data doesn't qualify as investigation records, aggregate counts of whether searches included case numbers cannot either.

Regarding § 1798.90.55(b): "ALPR information" is defined in § 1798.90.5(b) as "information or data collected through the use of an ALPR system." Aggregate search counts and compliance rates are administrative metadata about how humans accessed the system — not data collected by cameras. The California State Auditor — bound by the same statute — published equivalent aggregate ALPR statistics in Report 2019-118. If this data were "ALPR information," that publication would have violated § 1798.90.55(b).

I'd also note that the PRA requires specific statutory justification for each item denied (Gov. Code § 7922.000(a)). My request contained three items with multiple sub-items. The response applied both exemptions as a blanket across all items. Could you identify which exemption applies to which item?

Subject: California Public Records Request :: W012320-031126
Body:
RE: PUBLIC RECORDS REQUEST of March 11, 2026, **Reference # W012320-031126**

Dear Brian C,

The City received the following records request on March 11, 2026.

Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

A good faith and diligent search yielded no records responsive to your request for aggregate data. All audit records maintained by the Department were provided to you in your request #W012129-020926. All other requests are exempt from release under the following exemptions:

Cal. Government Code section 7923.600. because they are considered a record of investigation or intelligence with the San Mateo Police Department. Section 7923.600 provides that public agencies need not disclose records of investigations conducted by police agencies.

In addition, your request has been denied pursuant to Government Code 7927.705, as records prohibited from disclosure under federal or state law. In this case, Civil Code section 1798.90.55, subdivision (b) prohibits a public agency from selling, sharing, or transferring ALPR information, except to another public agency, and only as otherwise permitted by law.

If you have any questions, please contact me using the below contact information.
Sincerely,

Kelly O'Keefe

Request Created on Public Portal

On 3/11/2026 11:50:29 AM, San Mateo Public Records Center wrote:

Thank you for your interest in public records of the City of San Mateo. Your request was received by the City of San Mateo on 3/11/2026 and given the reference number **W012320-031126** for tracking purposes.

Record(s) Requested: **Pursuant to the California Public Records Act (Gov. Code § 6250 et seq.), I request the following records related to ALPR search activity compliance and audit obligations under SMPD Standard Operating Procedure 205.**

For context: SOP 205 has required quarterly operator audits on the Flock Safety platform since at least October 25, 2019, and Flock-specific end-user audits since February 10, 2021. These audits must review: operator usage and sign-on information; dates and times of access; entry of required search information by the End-User (case number, etc); and connection between searched data and listed justification. Audit results must be submitted to the Support Services Captain per SOP 205.5.1.

This request is specifically directed at search activity compliance — whether searches included required justification and whether that justification was audited per SOP 205's criteria. Prior PRA responses produced three audit memos (Lt. Casazza to Chief Barberini, covering November 2025, December 2025, and January 2026). Those memos review sharing configuration: user account counts, sharing settings, and whether out-of-state sharing is revoked. They do not address whether individual searches included

the case number or justification required by SOP 205's end-user audit criteria. Re-production of those sharing configuration memos would not be responsive to this request.

I am not requesting the content of any search query, license plates searched, results of any search, or any information that would identify the subject of an investigation. I am requesting only aggregate compliance metadata and audit records.

Item 1. SOP 205 quarterly search activity audit records. All quarterly audit memoranda, reports, or other documentation that reviewed search activity compliance on the Flock Safety platform, produced pursuant to SOP 205. Specifically:

(a) All quarterly end-user audit records verifying search justification compliance (case number entry, connection between searched data and stated justification). SOP 205 has required these since at least February 10, 2021.

(b) All quarterly operator audit records for the Flock Safety platform. SOP 205 has required these since at least October 25, 2019.

(c) All records of audit results submitted to the Support Services Captain per SOP 205.5.1, or any alternate recipient such as the ALPR Committee Captain or the Chief of Police.

(d) The date ranges in this request are based on the understanding that the first Flock Safety devices became operational on or about November 12, 2022 (per INV-10888). If any Flock-related audit records, search activity, or platform data exists from prior to that date, please include those records and indicate the earliest date of Flock activity.

I request all such records from November 2022 through the date of this request. If no quarterly search activity audits have ever been conducted under SOP 205, I request confirmation of that fact, including the total number of quarterly audit cycles that have elapsed without a documented search activity audit.

Item 2. Aggregate search compliance data. Search activity compliance data from the Flock Safety platform, from November 2022 through the date of this request. For quarters where audit records exist per Item 1 and contain the quantified data described below, those audits are sufficient. For quarters where audit records exist but contain only narrative summaries without underlying counts, I request the platform data that was reviewed as part of those audits. For quarters where no audit records are available, I request this data exported from the Flock platform at whatever granularity it supports (monthly or quarterly).

To be clear: the data requested below consists of aggregate counts and compliance metadata — not the substance of any search, the plates queried, or the results returned. Aggregate counts of whether a justification field was populated do not reveal the subject of any investigation.

Specifically:

(a) Total number of ALPR searches conducted, broken out by: (i) searches by SMPD personnel; and (ii) searches by external agency personnel accessing SMPD data through Flock's network sharing or direct

sharing features.

(b) For each category in (a): the count of searches where a case number, incident number, or warrant number was entered, and the count where no such identifier was entered.

(c) For each category in (a): the count of searches where the connection between the searched data and the listed justification was verified, and the count where it was not — per SOP 205's "Connection between searched data and listed justification for the search" audit criterion.

(d) All records of searches flagged, identified, or documented as non-compliant — whether for missing justification, invalid or unverifiable case/incident numbers, or failure to demonstrate a connection between the searched data and the listed justification. If no responsive records exist, please indicate whether this means (i) searches were reviewed and none were found to be non-compliant, or (ii) no review of individual search compliance has been conducted.

(e) For any flagged entries in (d): records of the corrective actions taken, including notifications to the searching user or agency, referrals for disciplinary review, or changes to system access.

Item 3. External agency search activity. Records identifying which external agencies have conducted searches against SMPD's ALPR data since November 2022, including agencies that may have had access during part of this period but are no longer on the current access list. Specifically:

(a) The name of each agency that has conducted one or more searches against SMPD's Flock data since November 2022.

(b) The total number of searches conducted by each such agency.

I am not requesting the substance of any search — only agency names and aggregate counts. If records are not available for the full period, I request whatever date range is available together with a statement of the earliest date for which records exist.

I request responsive records in their native electronic format (e.g., CSV or Excel exports from Flock Safety's audit dashboard, PDF for memoranda). If any portion of this request is denied, please respond to that item separately, state the specific legal basis for the denial, and continue processing the remaining items.

The request is being forwarded to appropriate department(s) for processing.

Monitor request progress at the link below. The City will email you when the request is complete. Thank you for using the San Mateo Records Center.
