INTEROFFICE COMMUNICATION
San Mateo Police Department
Support Services Division

DATE: January 4th, 2020
TO: Captain David Norris
FROM: Lieutenant Matt Lethin
RE: Summary of Quarterly Audit of SMPD 'End-User' ALPR Data for Q4, 2020

Introduction

Per SMPD Standard Operating Procedure 205, our Department conducts quarterly audits of our 'End-User' data to ensure our employees are reviewing data in a manner consistent with policy and procedure. The data reviewed is generated and provided by the Northern California Regional Intelligence Center (NCRIC), as they are the keeper of this data. The results of these audits are summarized and presented to the Support Services Captain for review and later for retention by the Support Services Division.

Quarter 4, 2020 (October, November, December)

Our employees conducted 207 searches of ALPR historical data through the NCRIC platform, which is almost a 200% increase in quarterly usage. This increase is reasonable, as almost half of the searches were related to the homicide on October 30th. A handful of searches were conducted as tests to check that the system was functioning correctly. All searches were determined to list the required criteria as required by our policy and procedure. As is usual, the top two reasons for searches were "Stolen or Wanted" or "Criminal or Arrest."

Audit Focus	Q4/2020	Quarterly Average
Number of searches	207	102
Number of searches with required criteria (as %)	100%	99.5%
Case numbers listed	154	83
Non-case numbers listed	53	19
(Reasons for search)	N/A	N/A
Missing/Amber/Silver Alert	1	1.5
Criminal or Arrest	96	54
Special Event	0	0.17
Stolen or Wanted	106	39
Violent Crime	4	7

Analysis and Conclusion

Our Department 'End-User' activity during the time period was consistent with Department policy and procedure. Our staff used this technology platform above normal usage rates, which is reasonable given the types of investigations they were conducting. No additional efforts are recommended.
